

JPI Healthy and Productive Seas and Oceans A New Frontier

Content

1. What is Joint Programming?

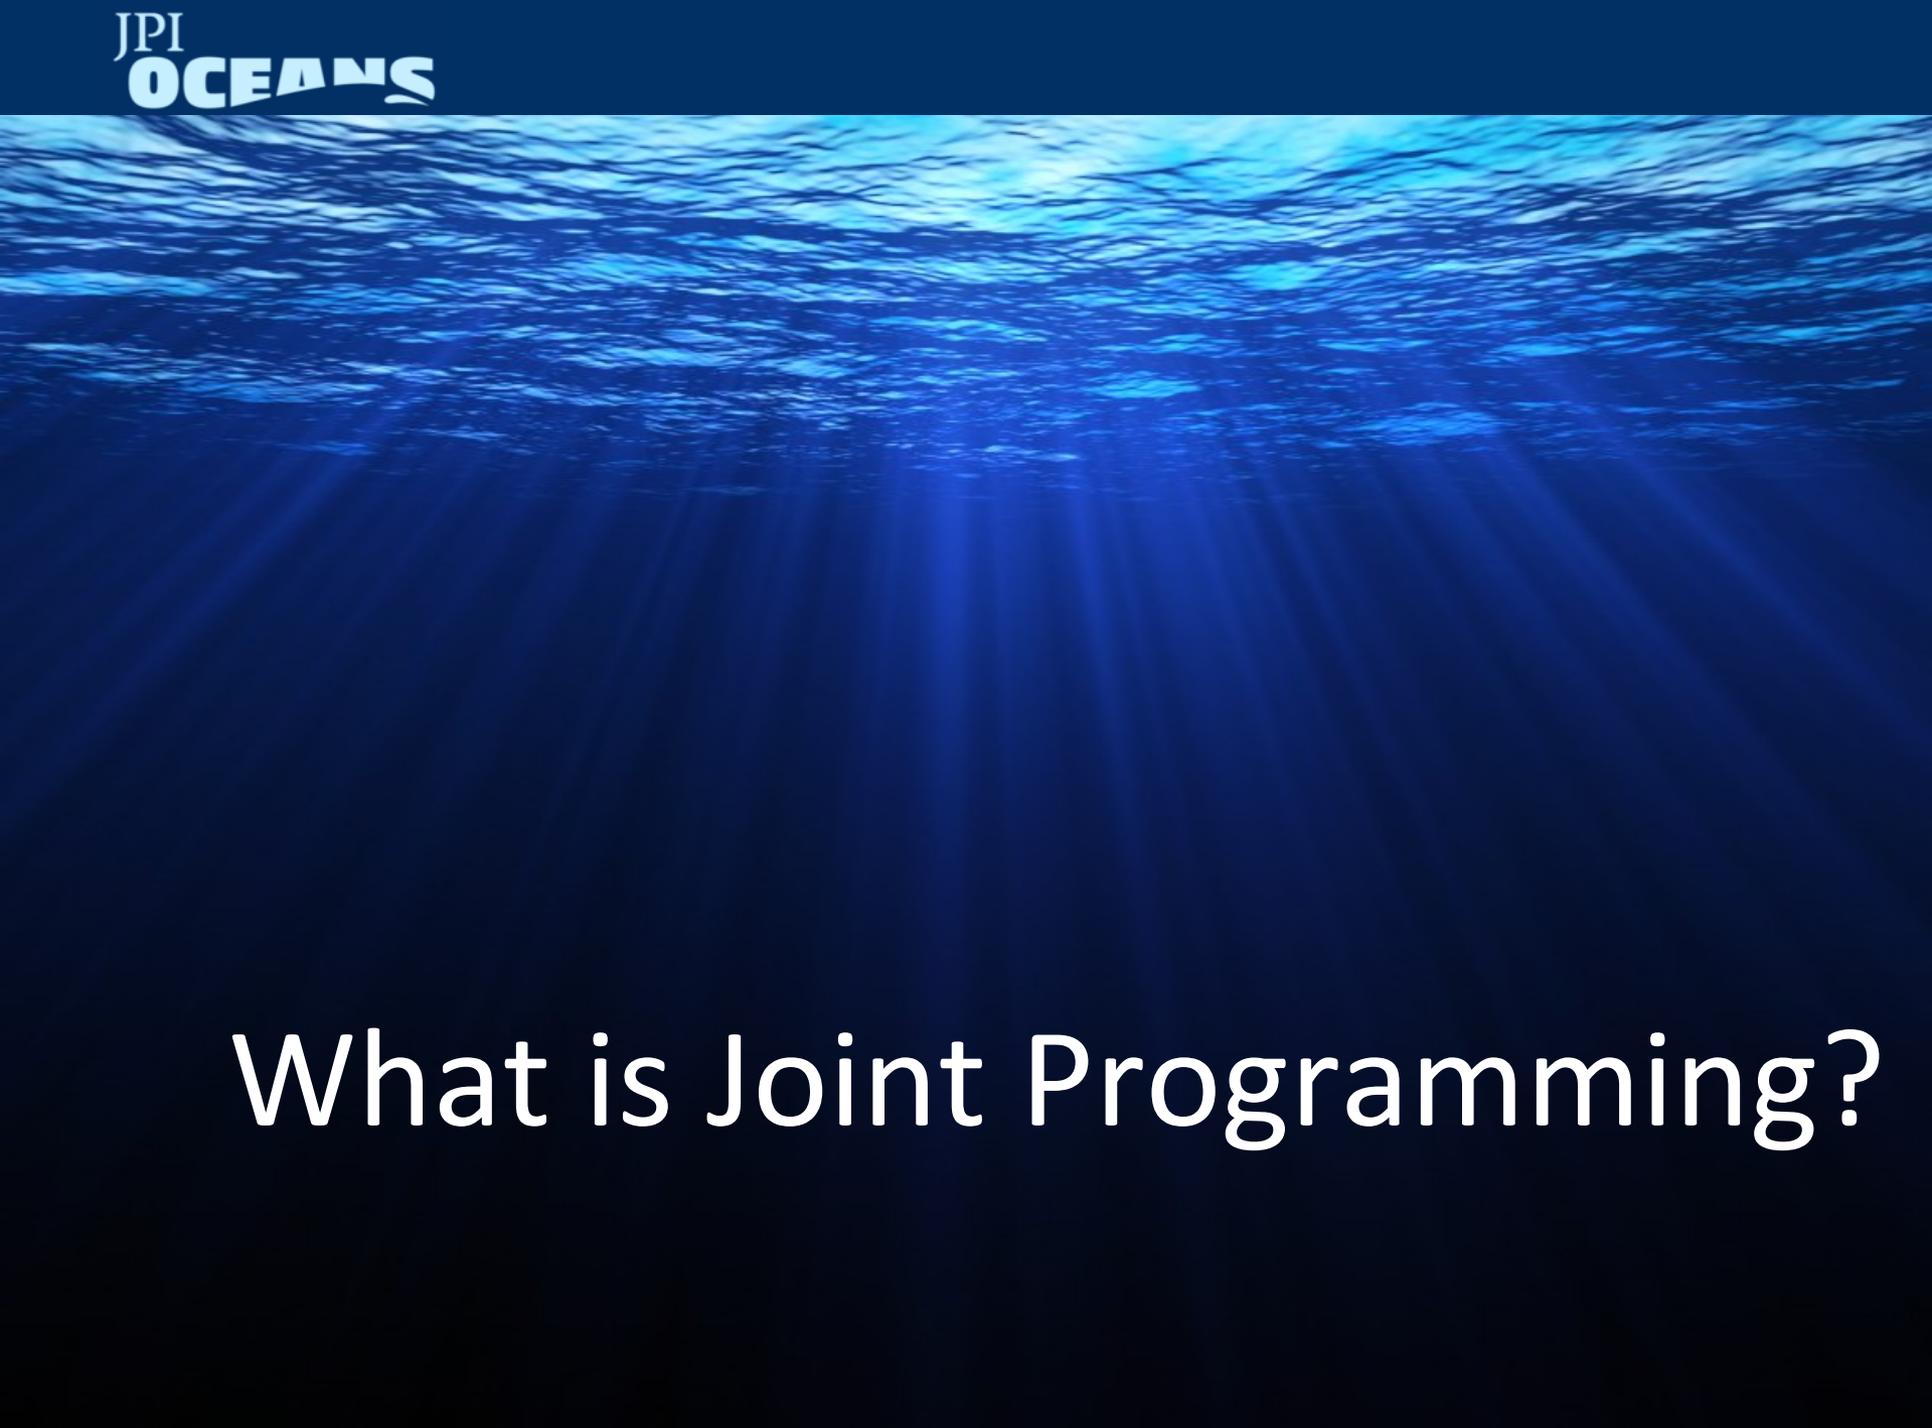

1. Scientific policy driver

2. Oceans as a grand challenge

1. Policy drivers

3. JPI Oceans

1. Objectives
2. State of Play

An underwater photograph showing sunbeams filtering through the water surface, creating a serene blue environment. The sunbeams are visible as bright rays of light descending from the surface, illuminating the water below. The overall color palette is various shades of blue, from light turquoise near the surface to deep navy blue in the lower half of the frame.

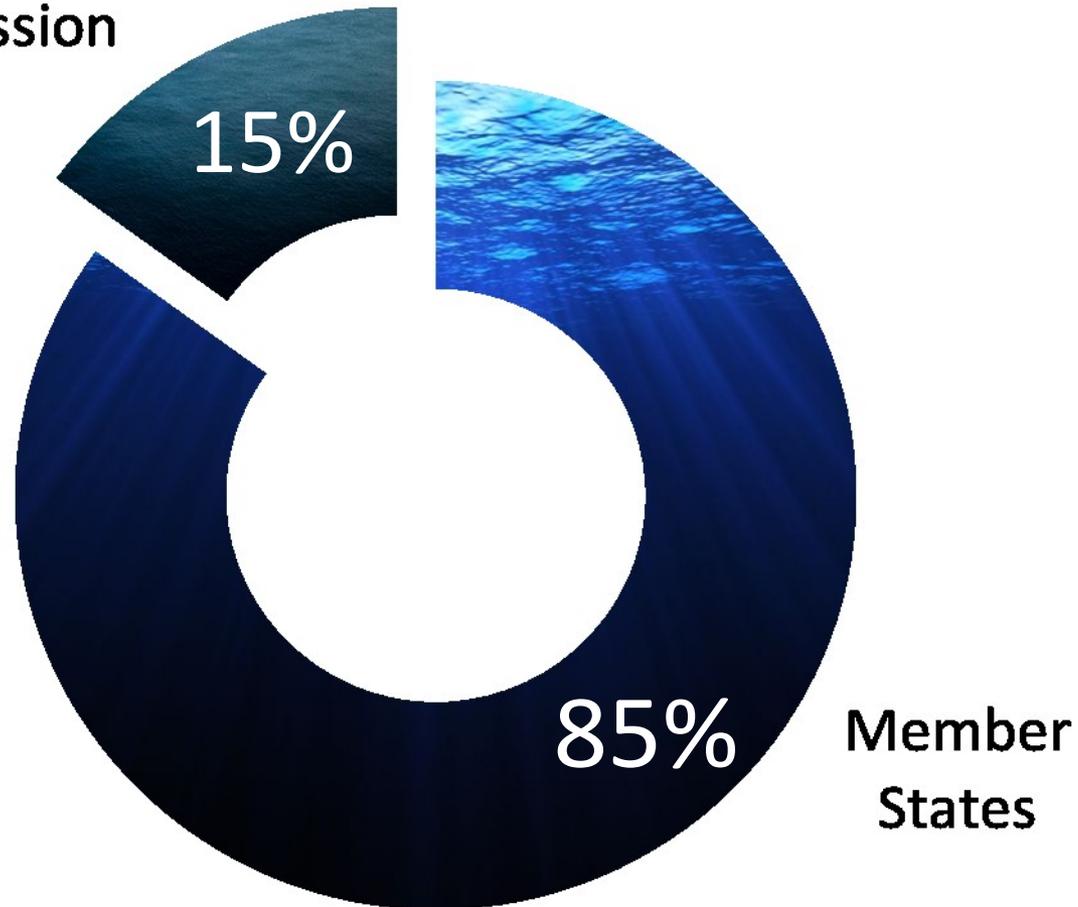

What is Joint Programming?

A concept to tackle challenges that can not be solved solely at national level

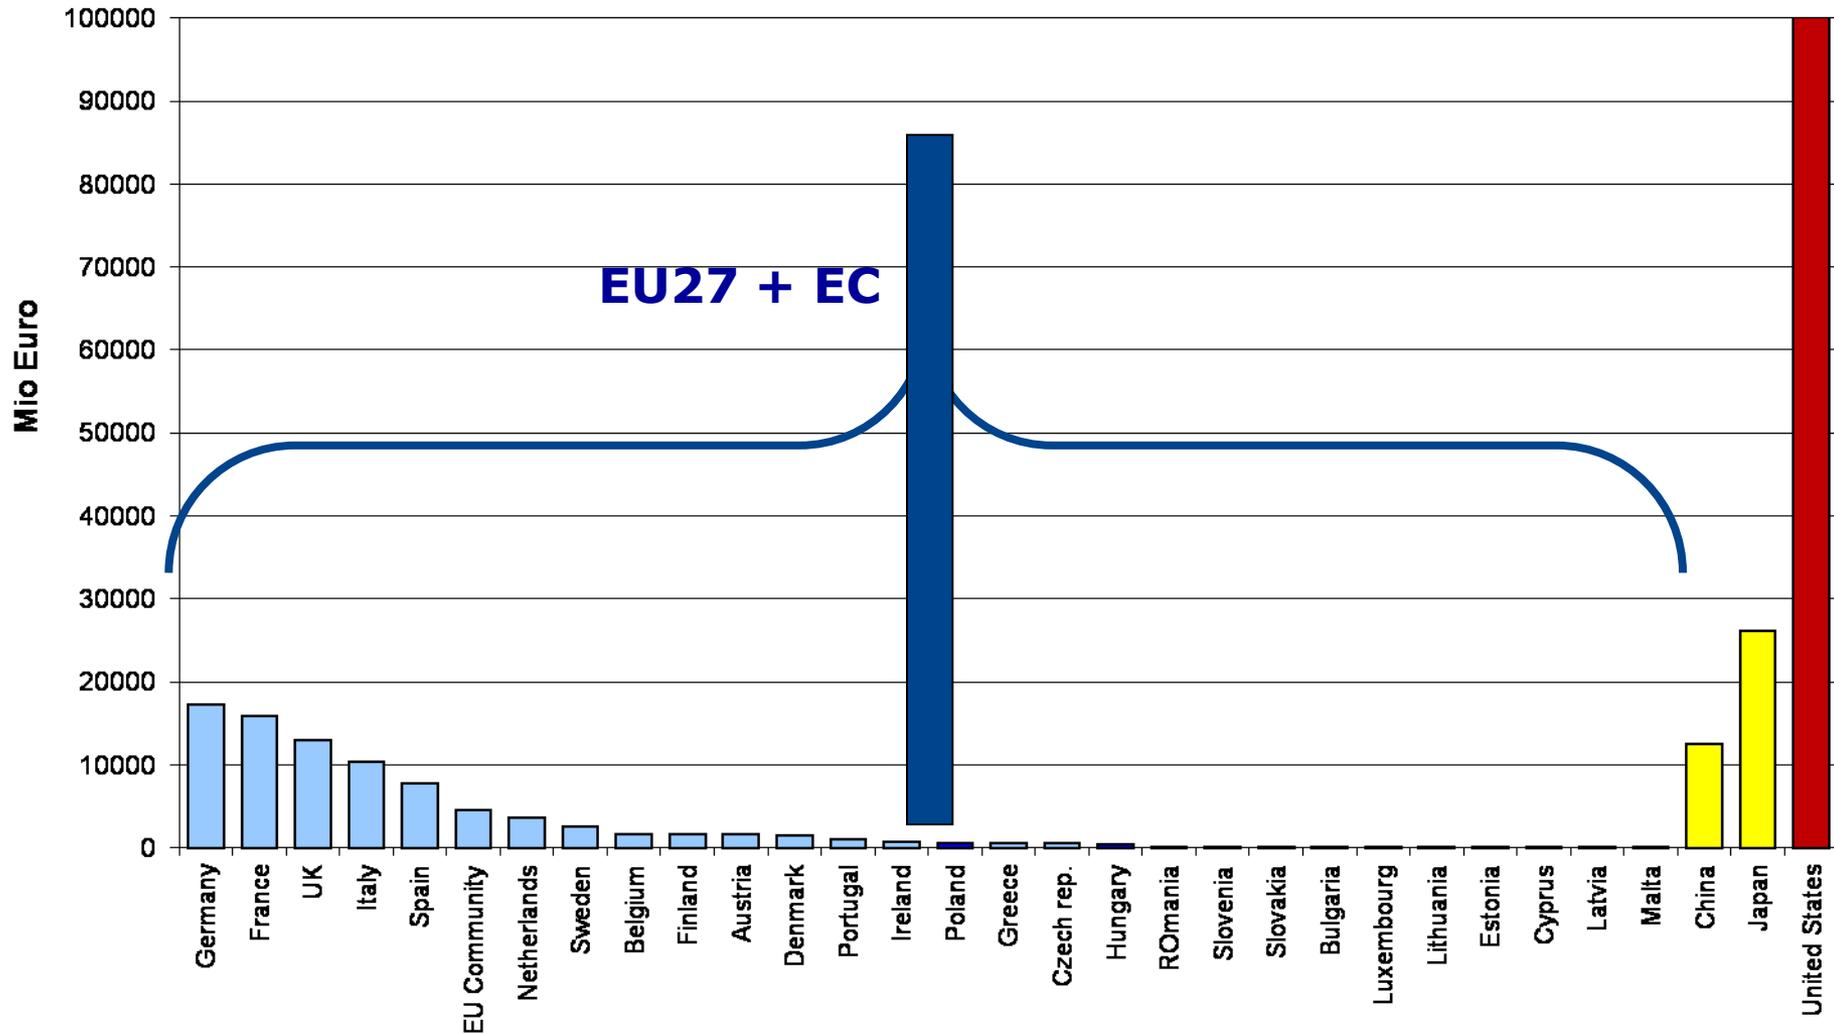

Research funding in Europe

Intergovernmental and
European Commission

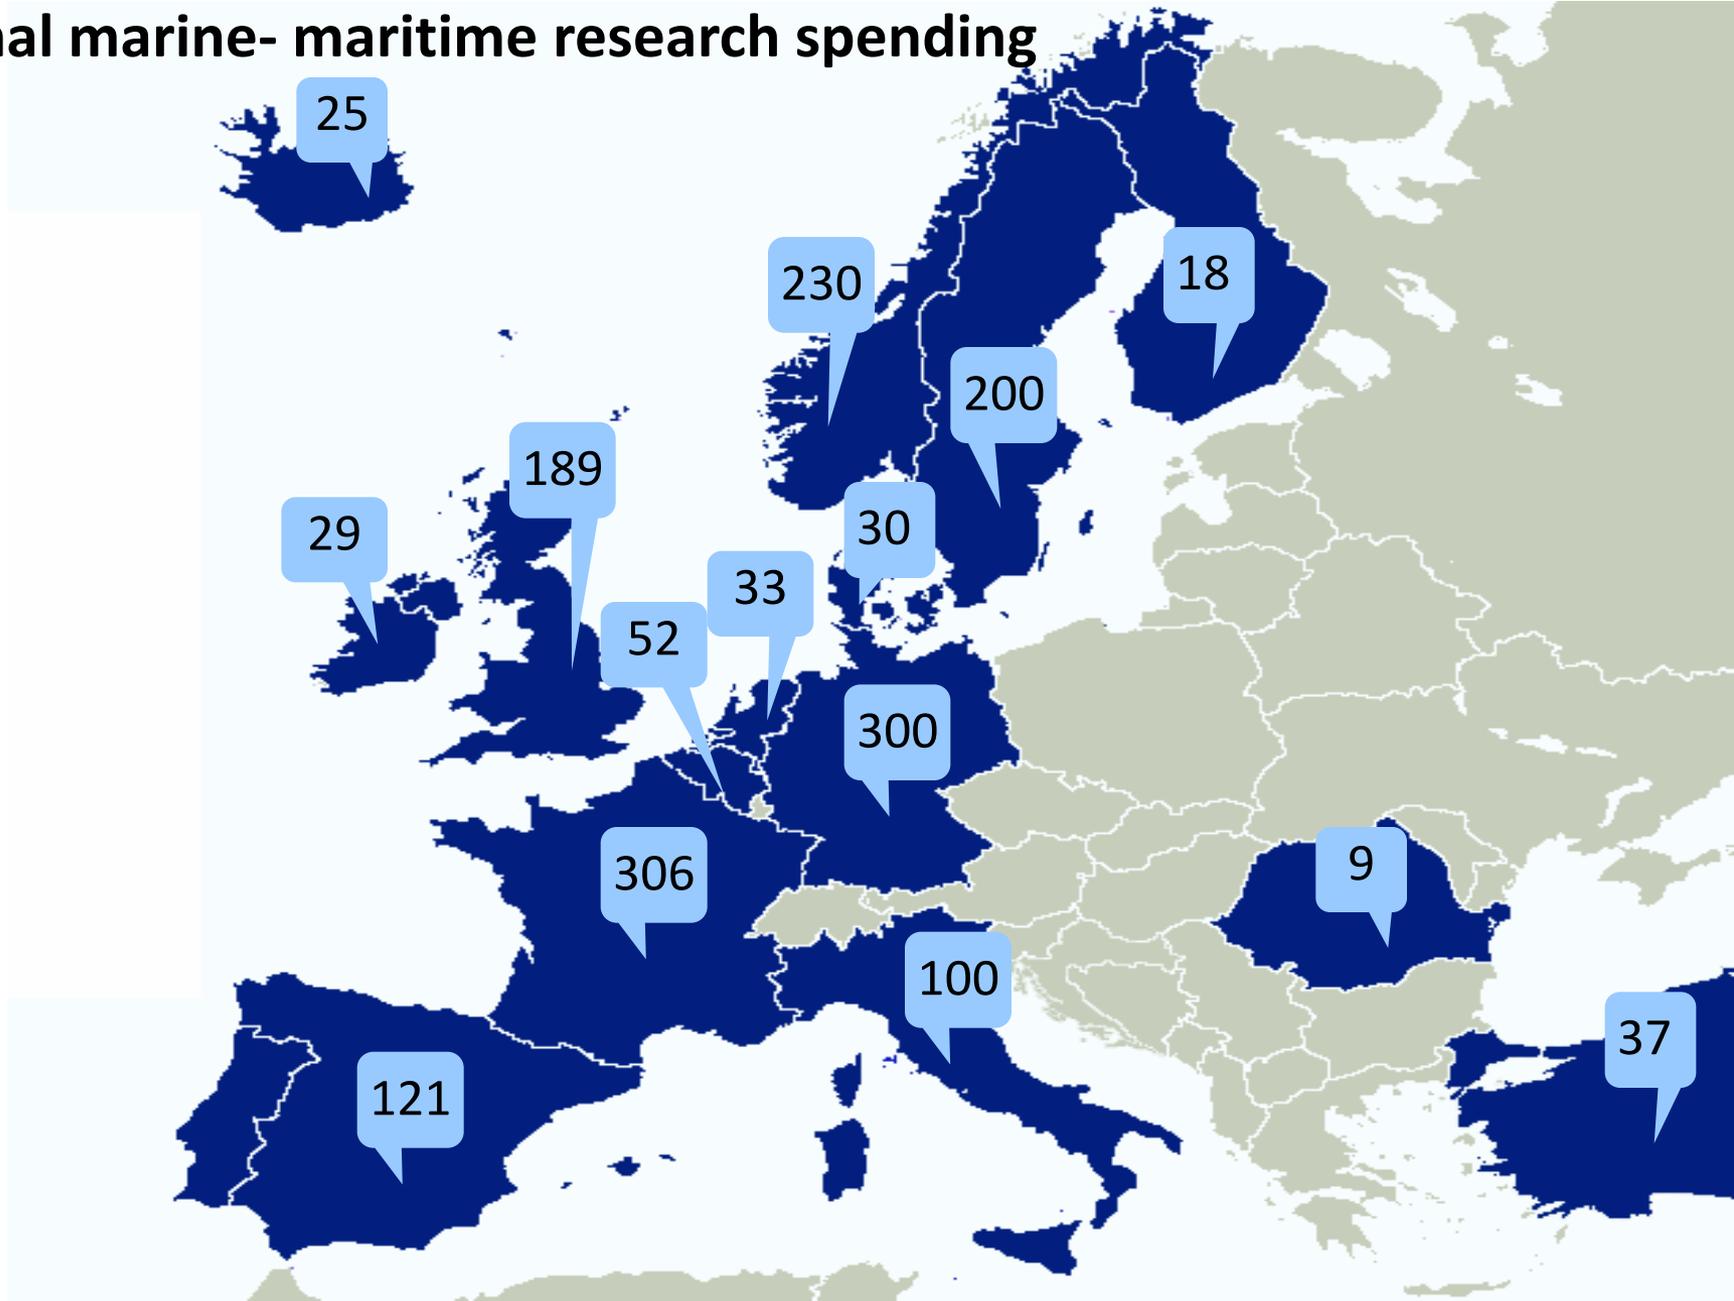

Why?

Public Funding for Research

Oceans as a grand challenge

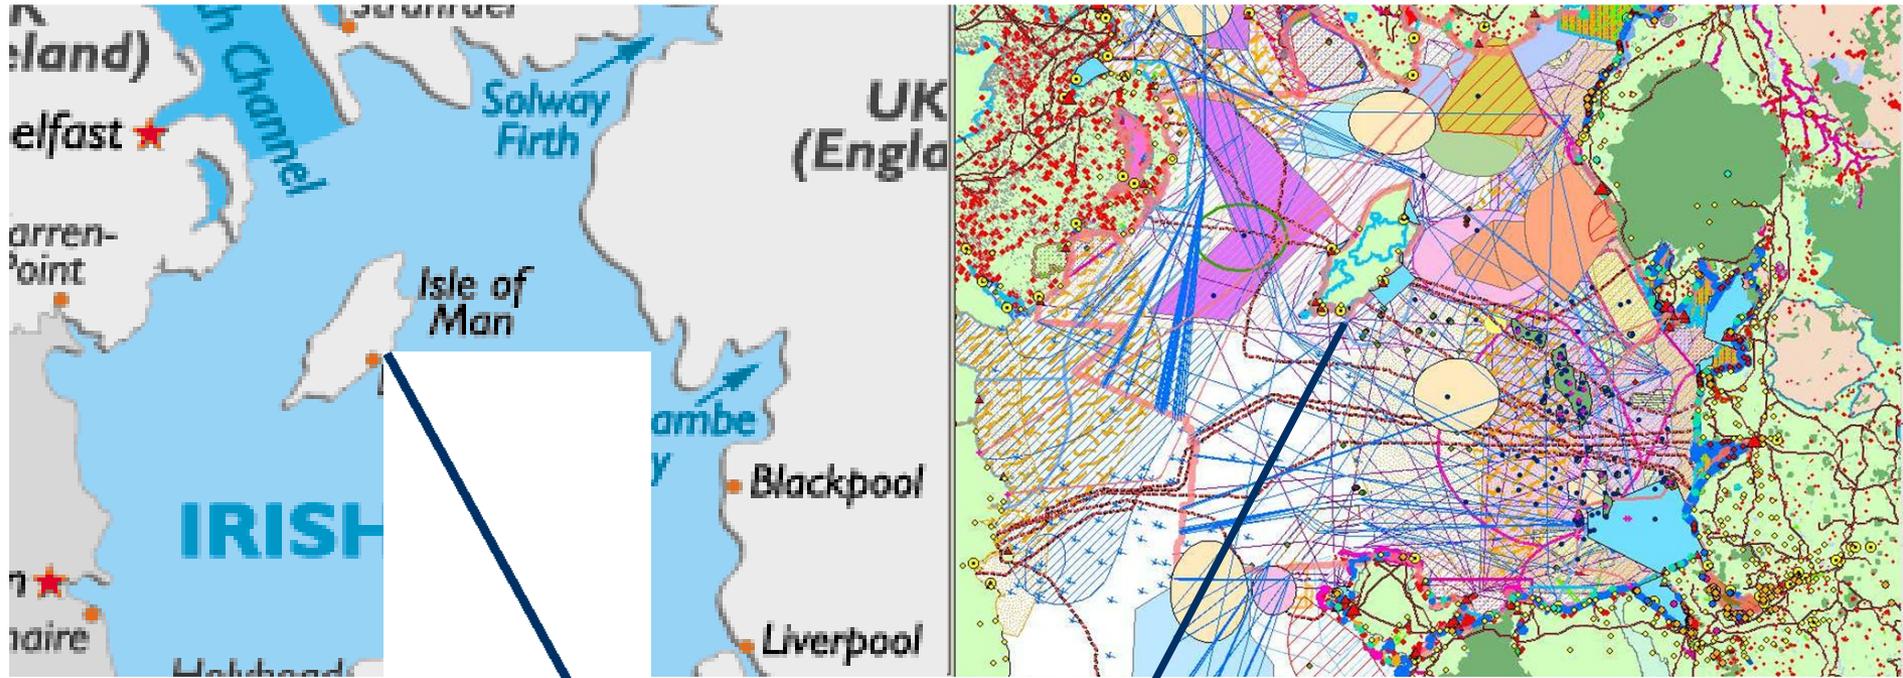

National marine- maritime research spending (M€)

Marine and Maritime Research

(estimates based on input and data analysis)

Marine – maritime annual research funding of JPI Oceans members		Marine –maritime annual research funding in FP7	
Marine Environment	25 %	Marine Environment *	29 %
Biological resources	25 %	Biological resources	19 %
Non-biological resources	20 %	Non-biological resources	21 %
Fisheries management	10 %	Oceans of Tomorrow (cross cutting)	9 %
Spatial planning and Socio economic research	5 %	Other	22 %
Climate and Ocean	15 %	* Marine environment probably includes climate change	
Total	1777 M €		213,5 M €

The Isle of Man

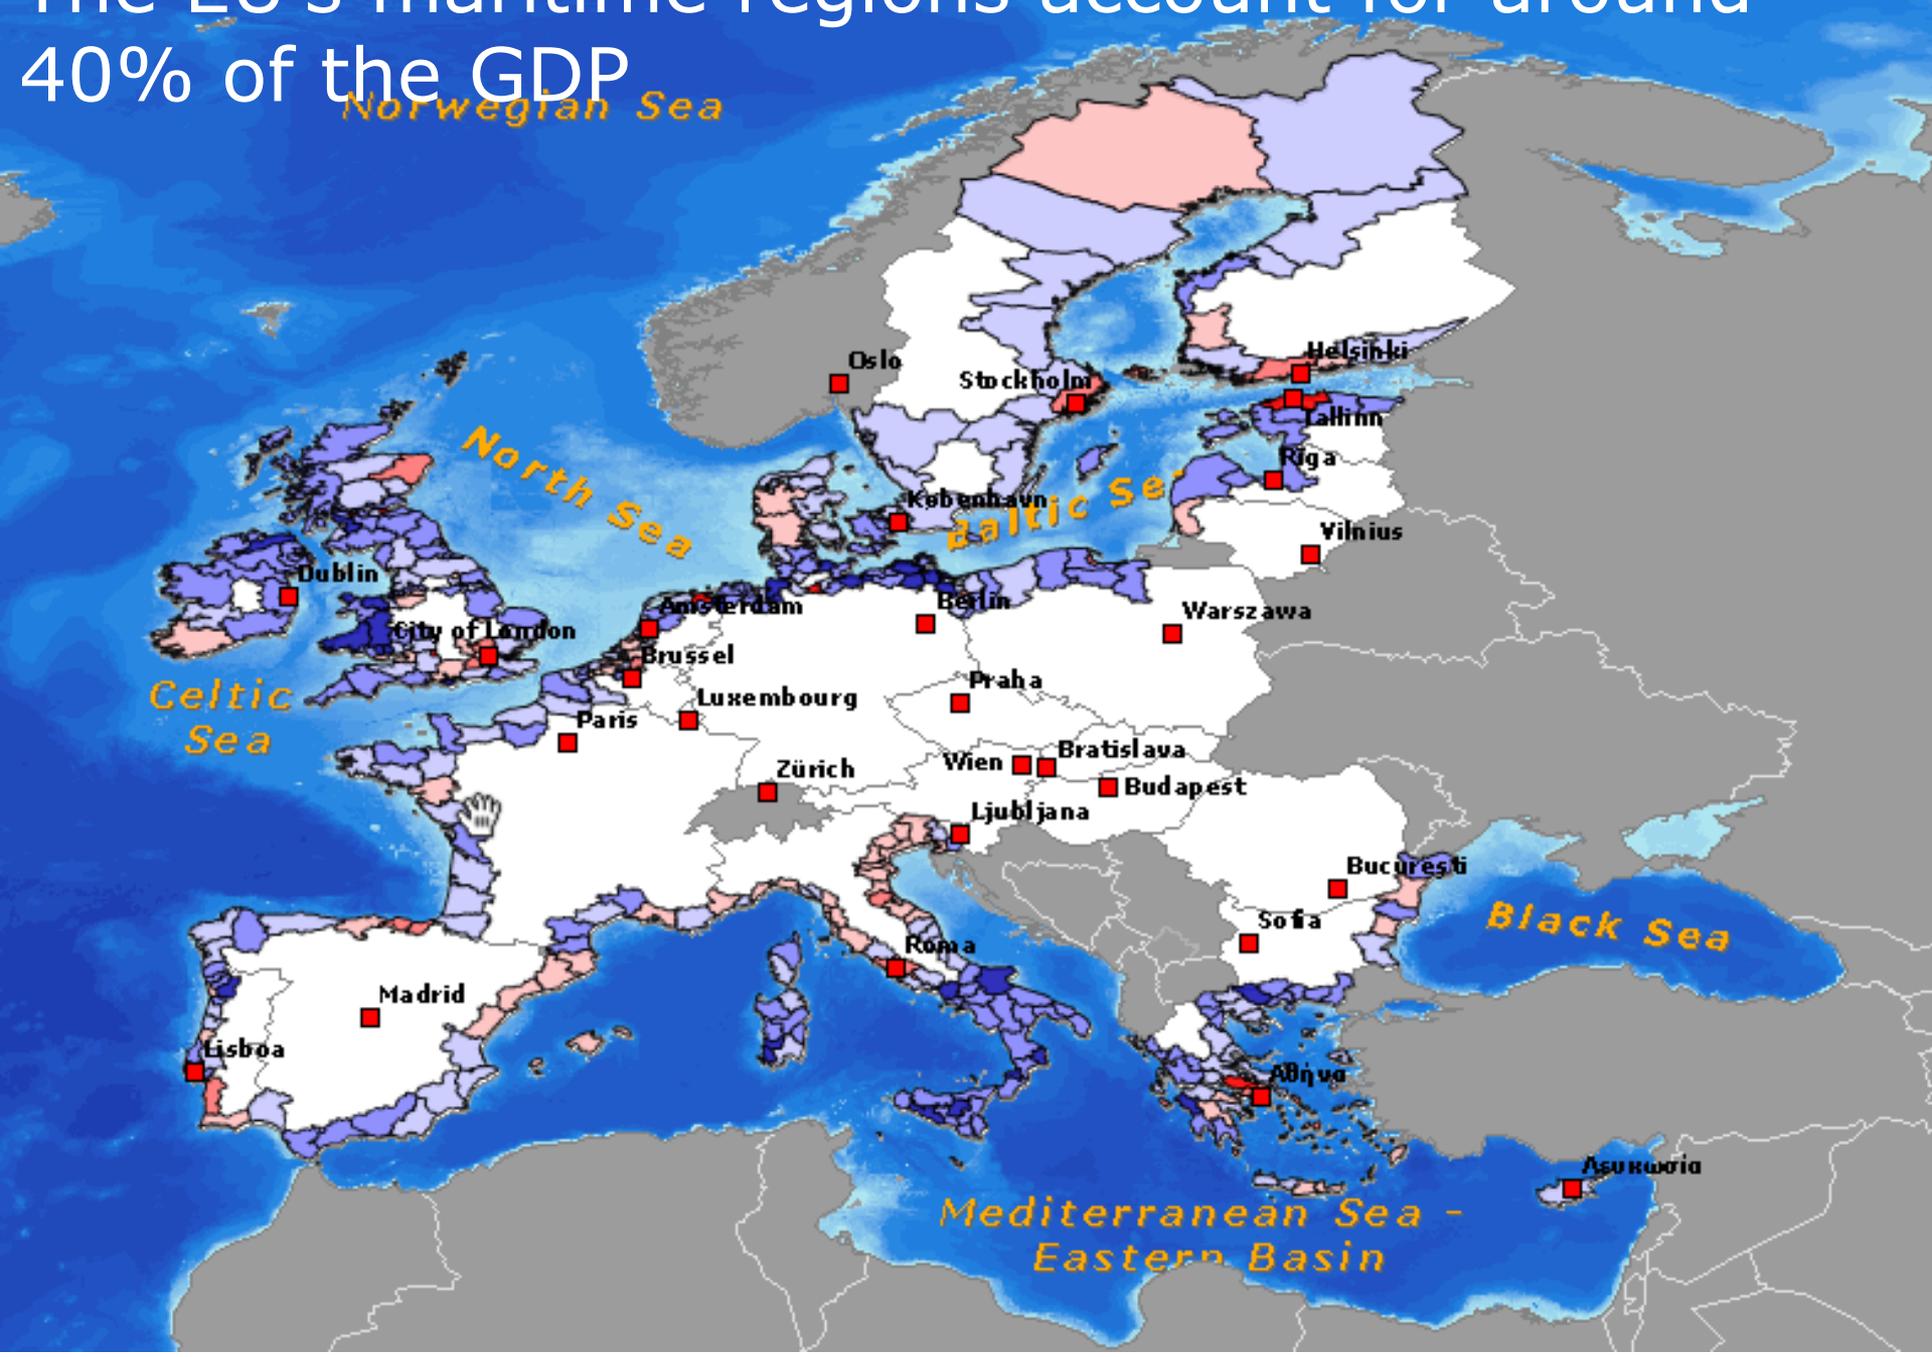

Marine litter

An underwater photograph showing sunlight rays filtering through the water surface, creating a dramatic blue and white light effect. The rays are most prominent in the center and right side of the frame, illuminating the water below. The overall color palette is a gradient of blues, from light cyan at the top to deep navy at the bottom.

Opportunities

The EU's maritime regions account for around 40% of the GDP

Maritime transport: 90% of EU's external trade

Fisheries, aquaculture and food processing:
€32 billion Euros yearly, 0.5 million jobs.

A close-up photograph of several pieces of raw salmon fillet, showing the characteristic orange-pink color and white marbling. A small dollop of bright green wasabi is placed on one of the pieces. The background is a soft, out-of-focus orange-red color.

The average
consumption of fish is
22.3 kg/person/year in
the EU .

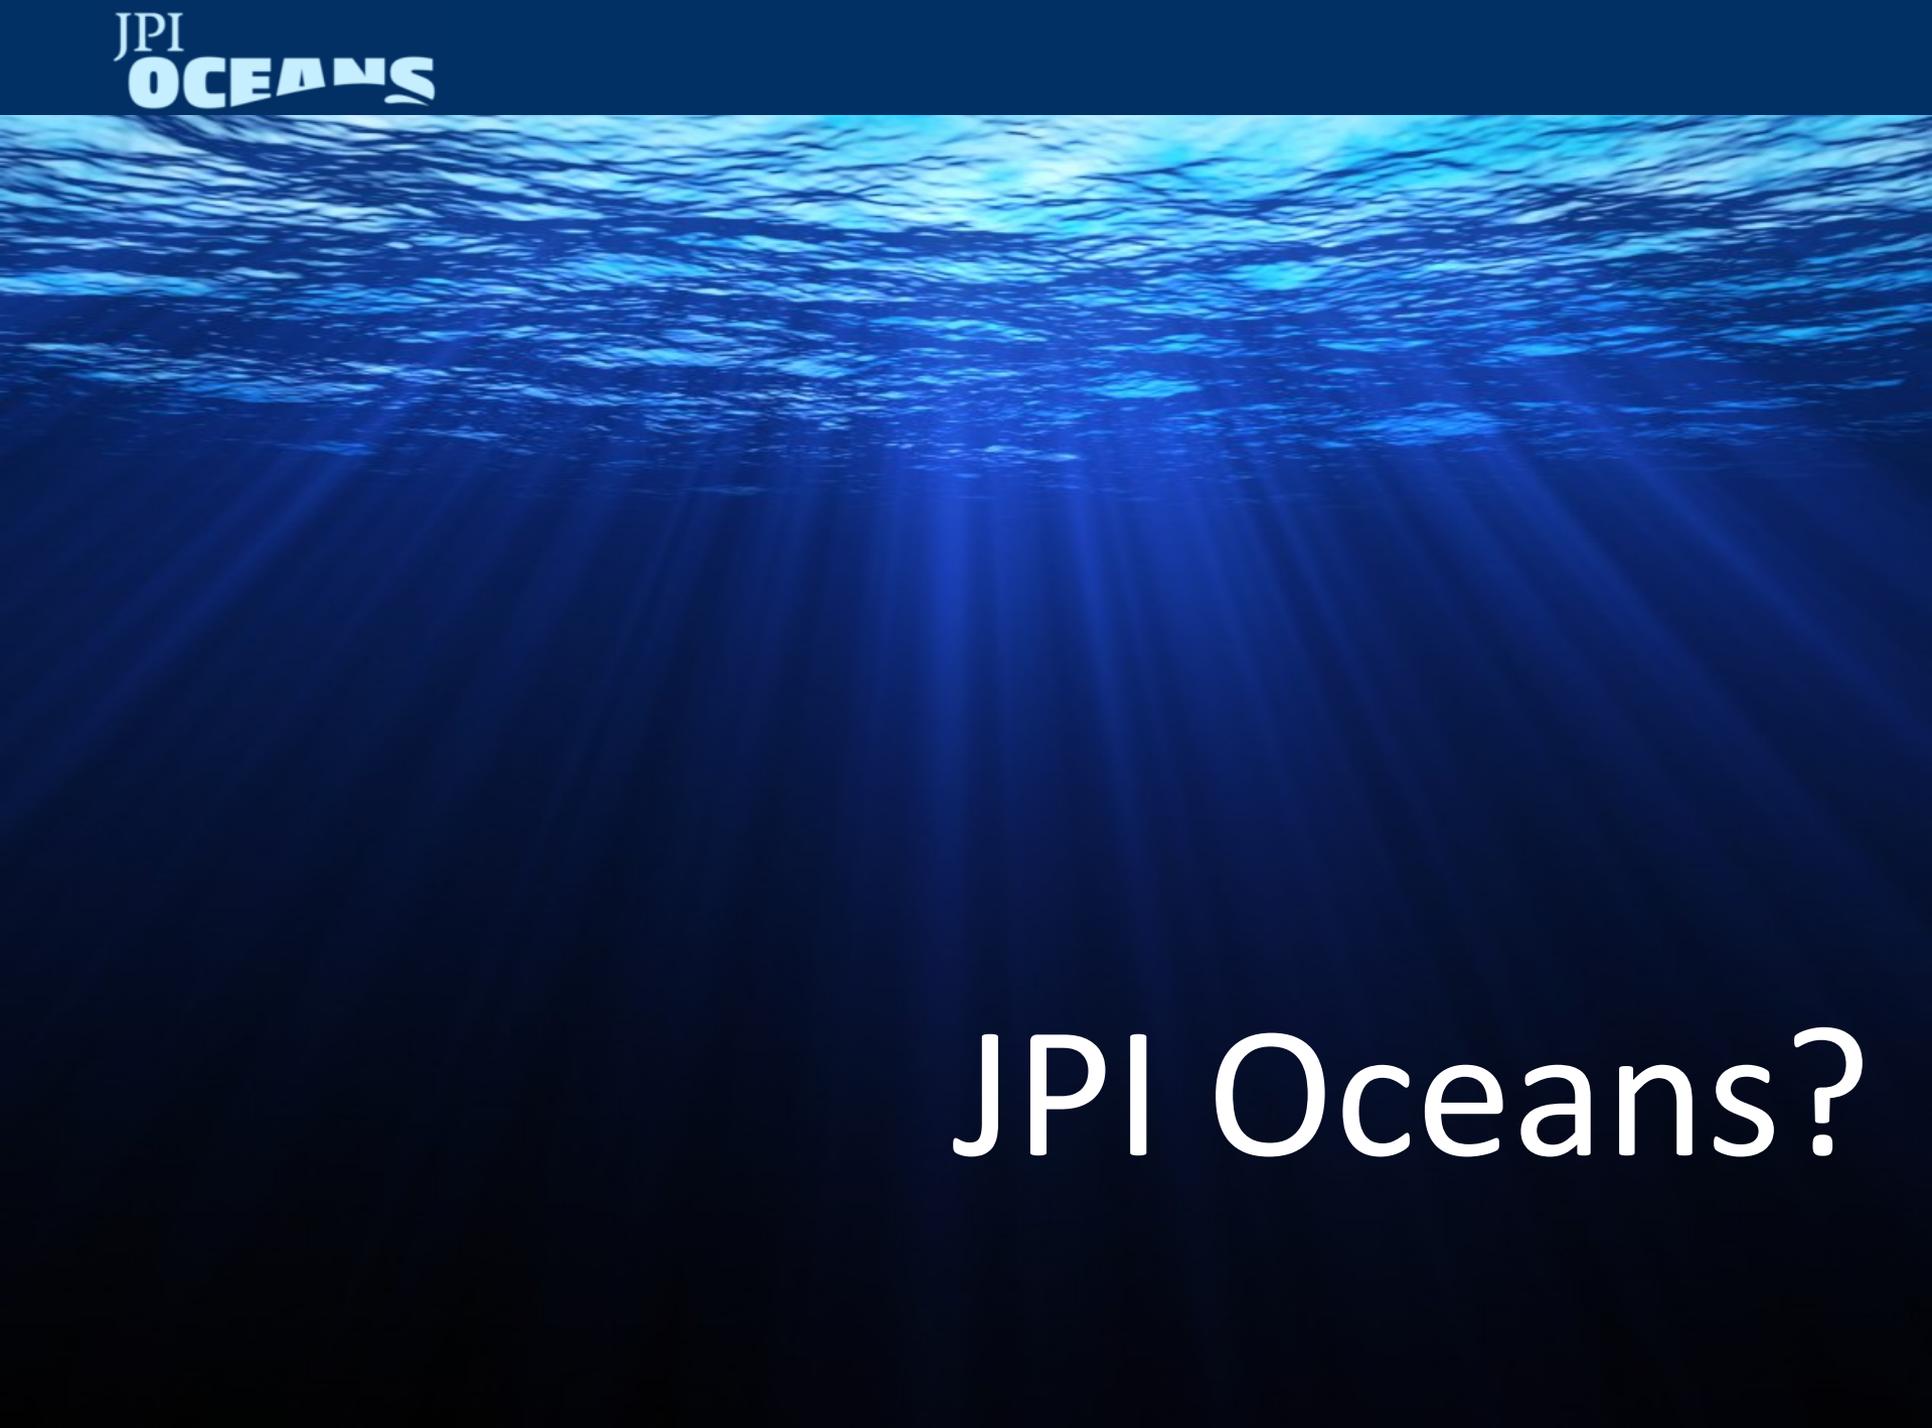

European maritime tourism: **3 million** jobs
and **72 billion** Euros of revenue per year.

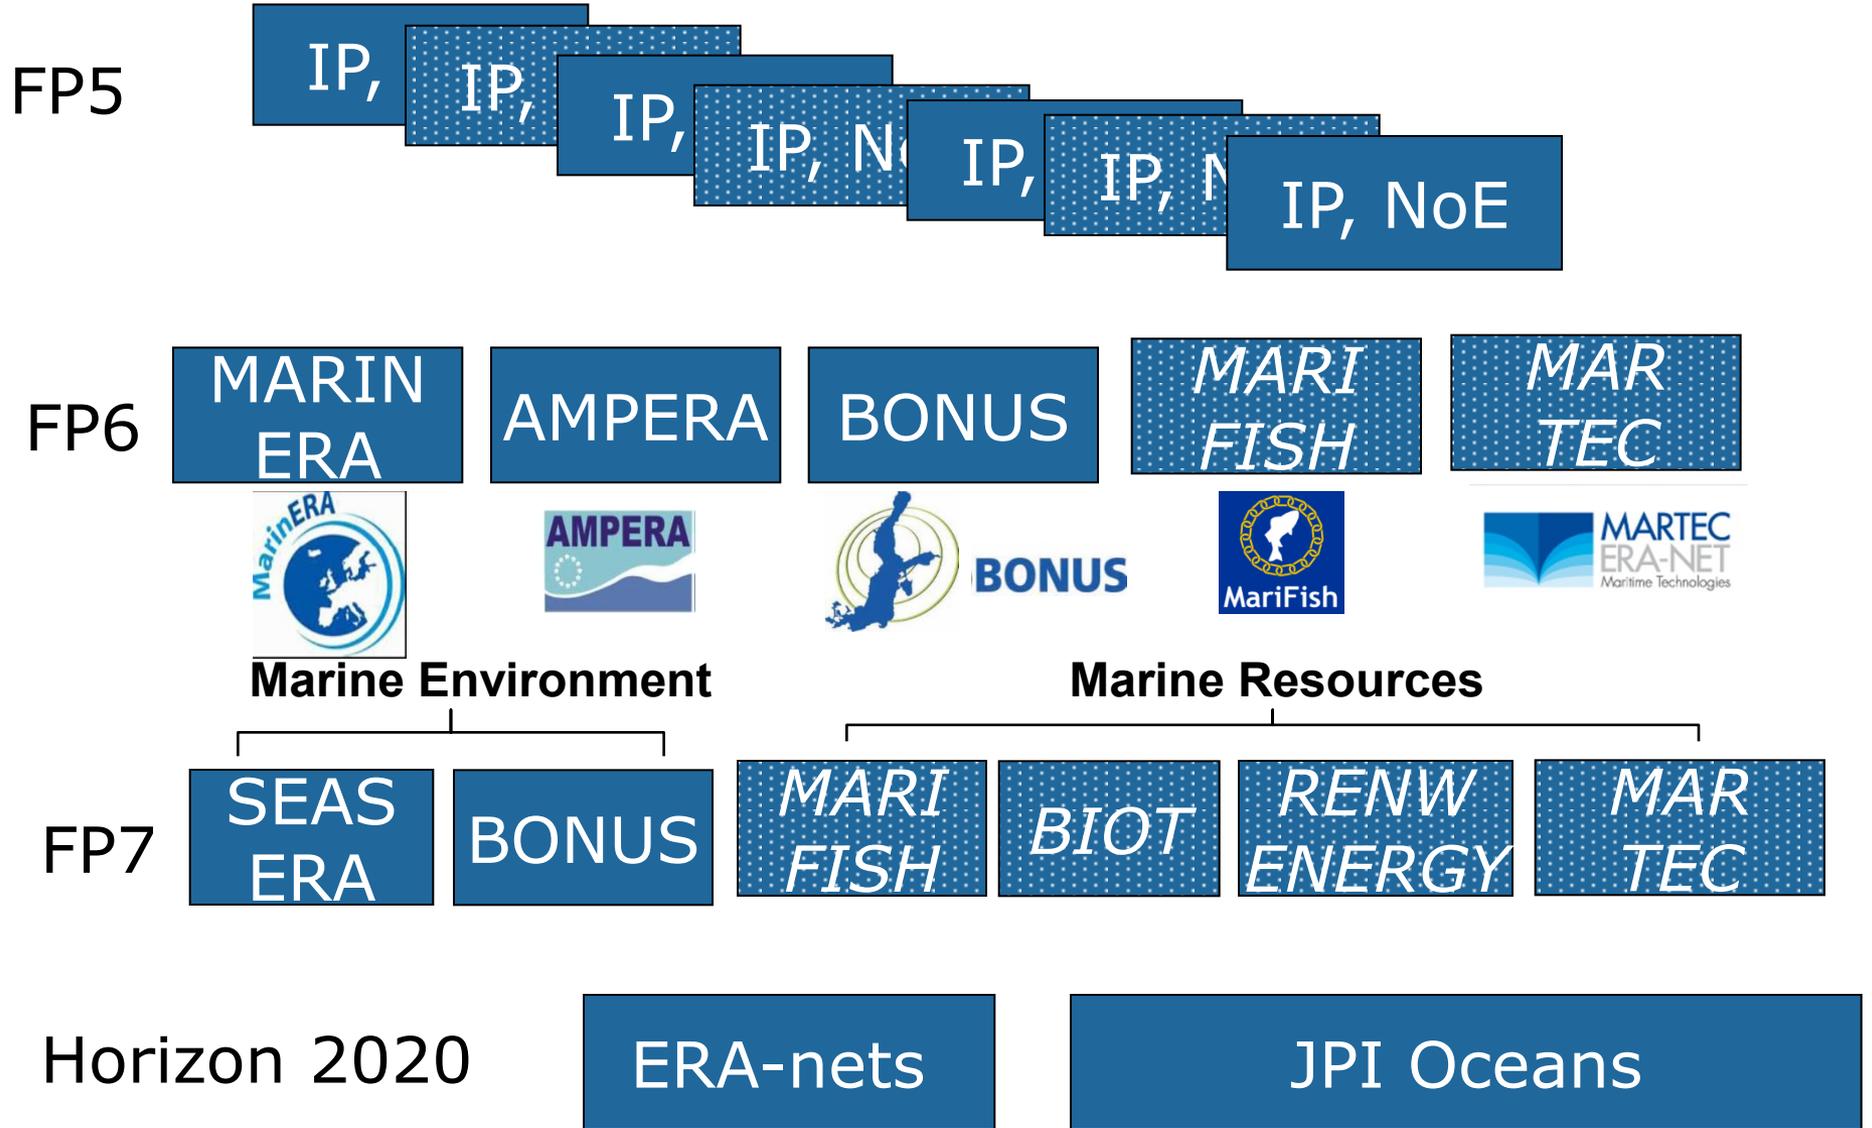

Policy Context

EU's Integrated Maritime Policy
MSFD, CFP,.....

JPI Oceans?

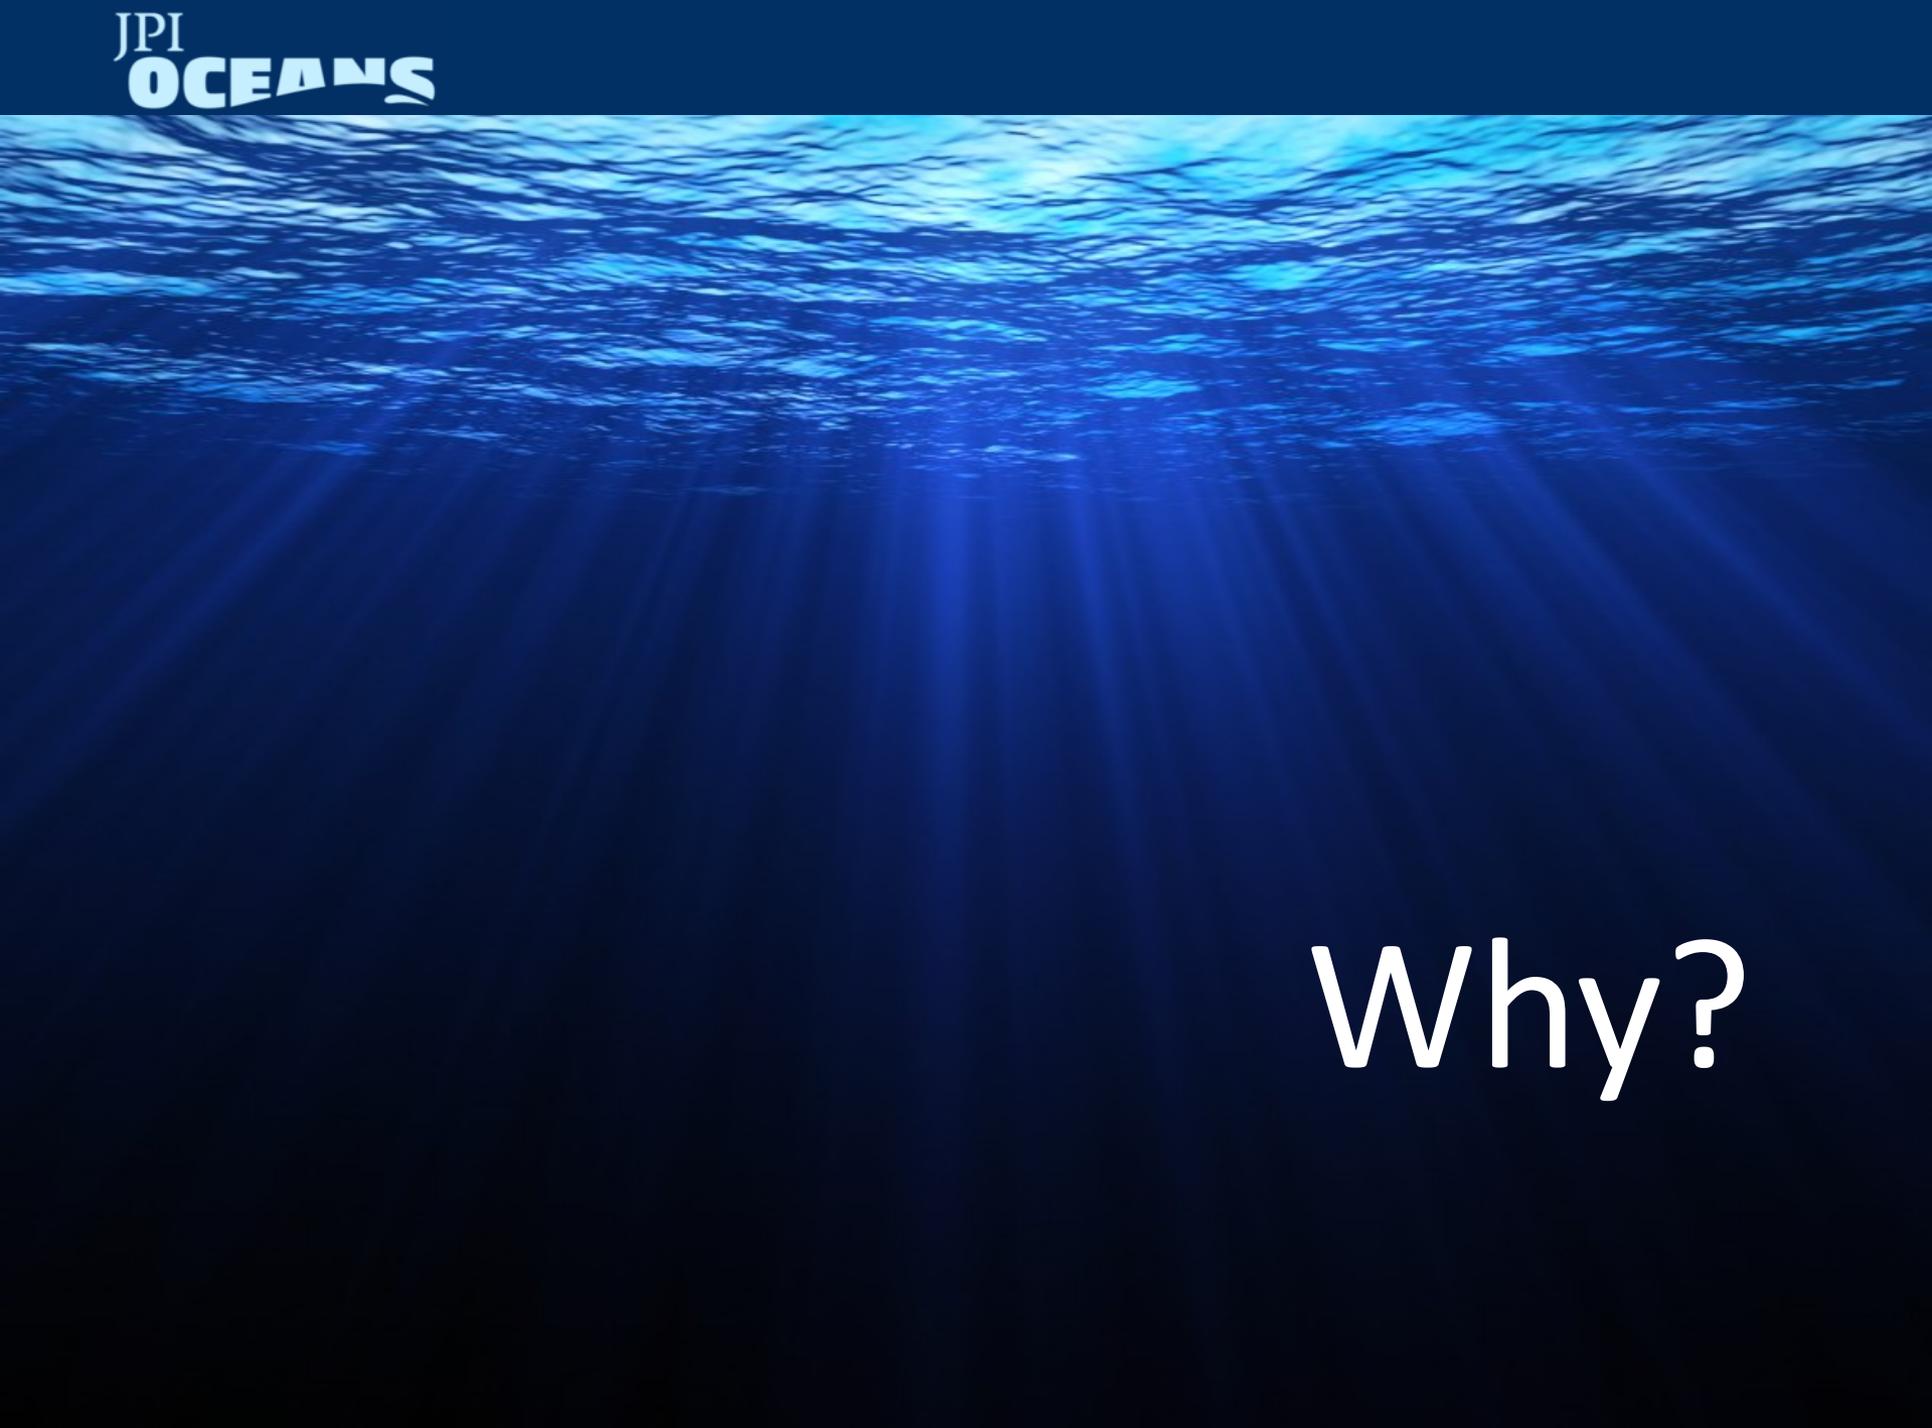

A coordinating and
integrating platform
for marine and
maritime research

17 Participating countries
(+ Outermost regions)

An underwater photograph showing sunlight rays filtering through the water surface, creating a serene and deep blue environment. The rays are most prominent in the center and right side of the frame, illuminating the water's surface ripples.

Why?

Avoid Fragmentation...

I WILL NOT COPY AGAIN I WILL NOT COPY A
I WILL NOT COPY AGAIN I WILL NOT COPY A
I WILL NOT COPY AGAIN I WILL NOT COPY A
I WILL NOT COPY AGAIN I WILL NOT COPY A
I WILL NOT COPY AGAIN I WILL NOT COPY A
I WILL NOT COPY AGAIN I WILL NOT COPY A

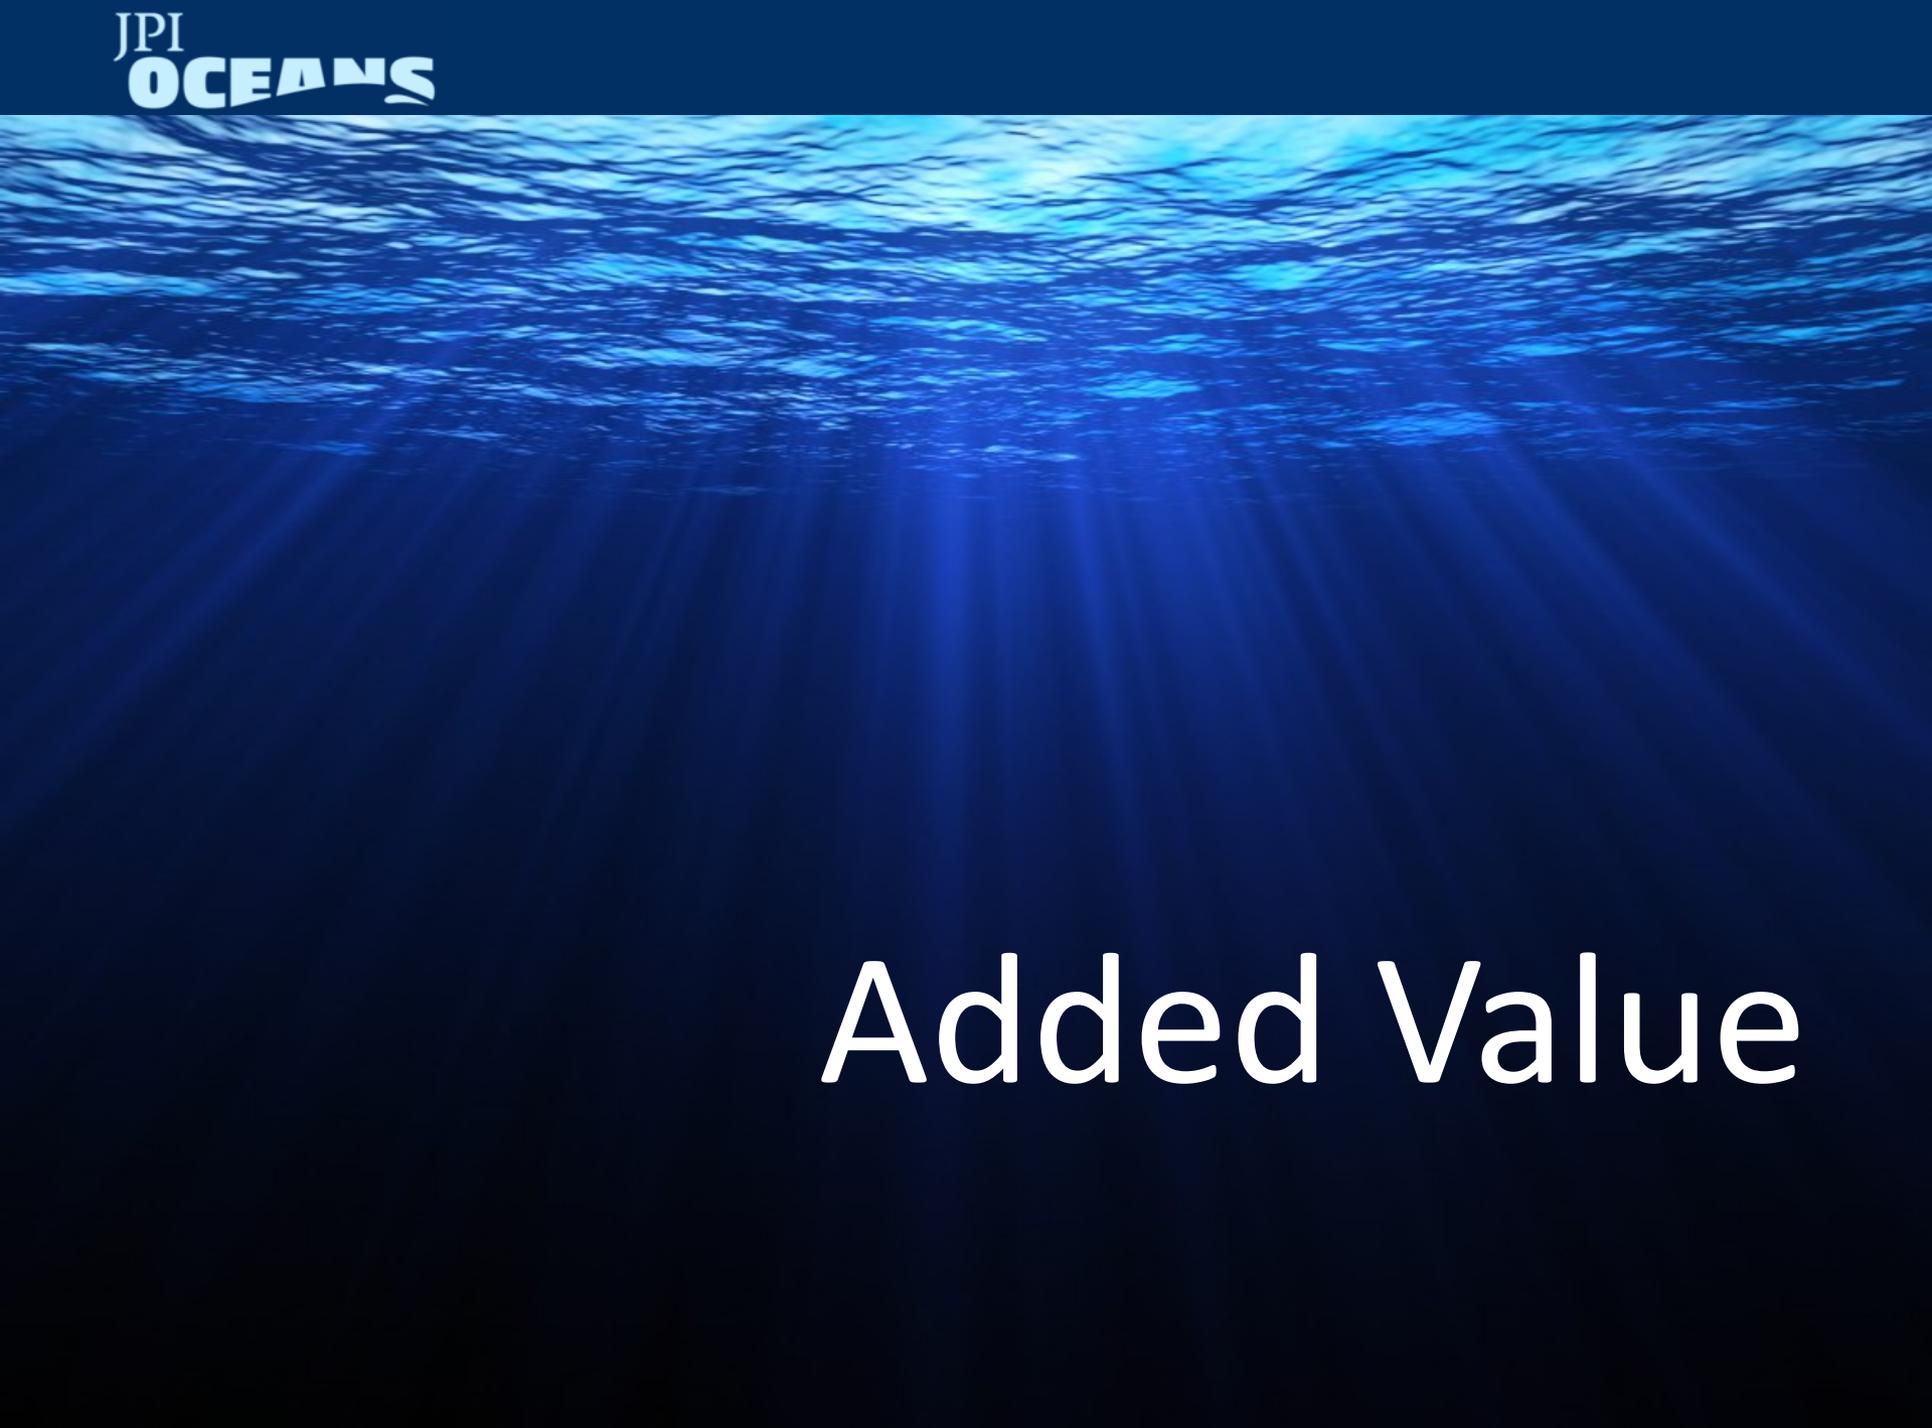

...and unnecessary duplication

Facilitate cooperation
Plan common initiatives

Look for synergies

An underwater photograph showing sunlight rays filtering through the water, creating a serene and deep blue environment. The rays are prominent, extending from the surface down into the water, creating a sense of depth and tranquility. The water's surface is visible at the top, with gentle ripples and light reflections.

Added Value

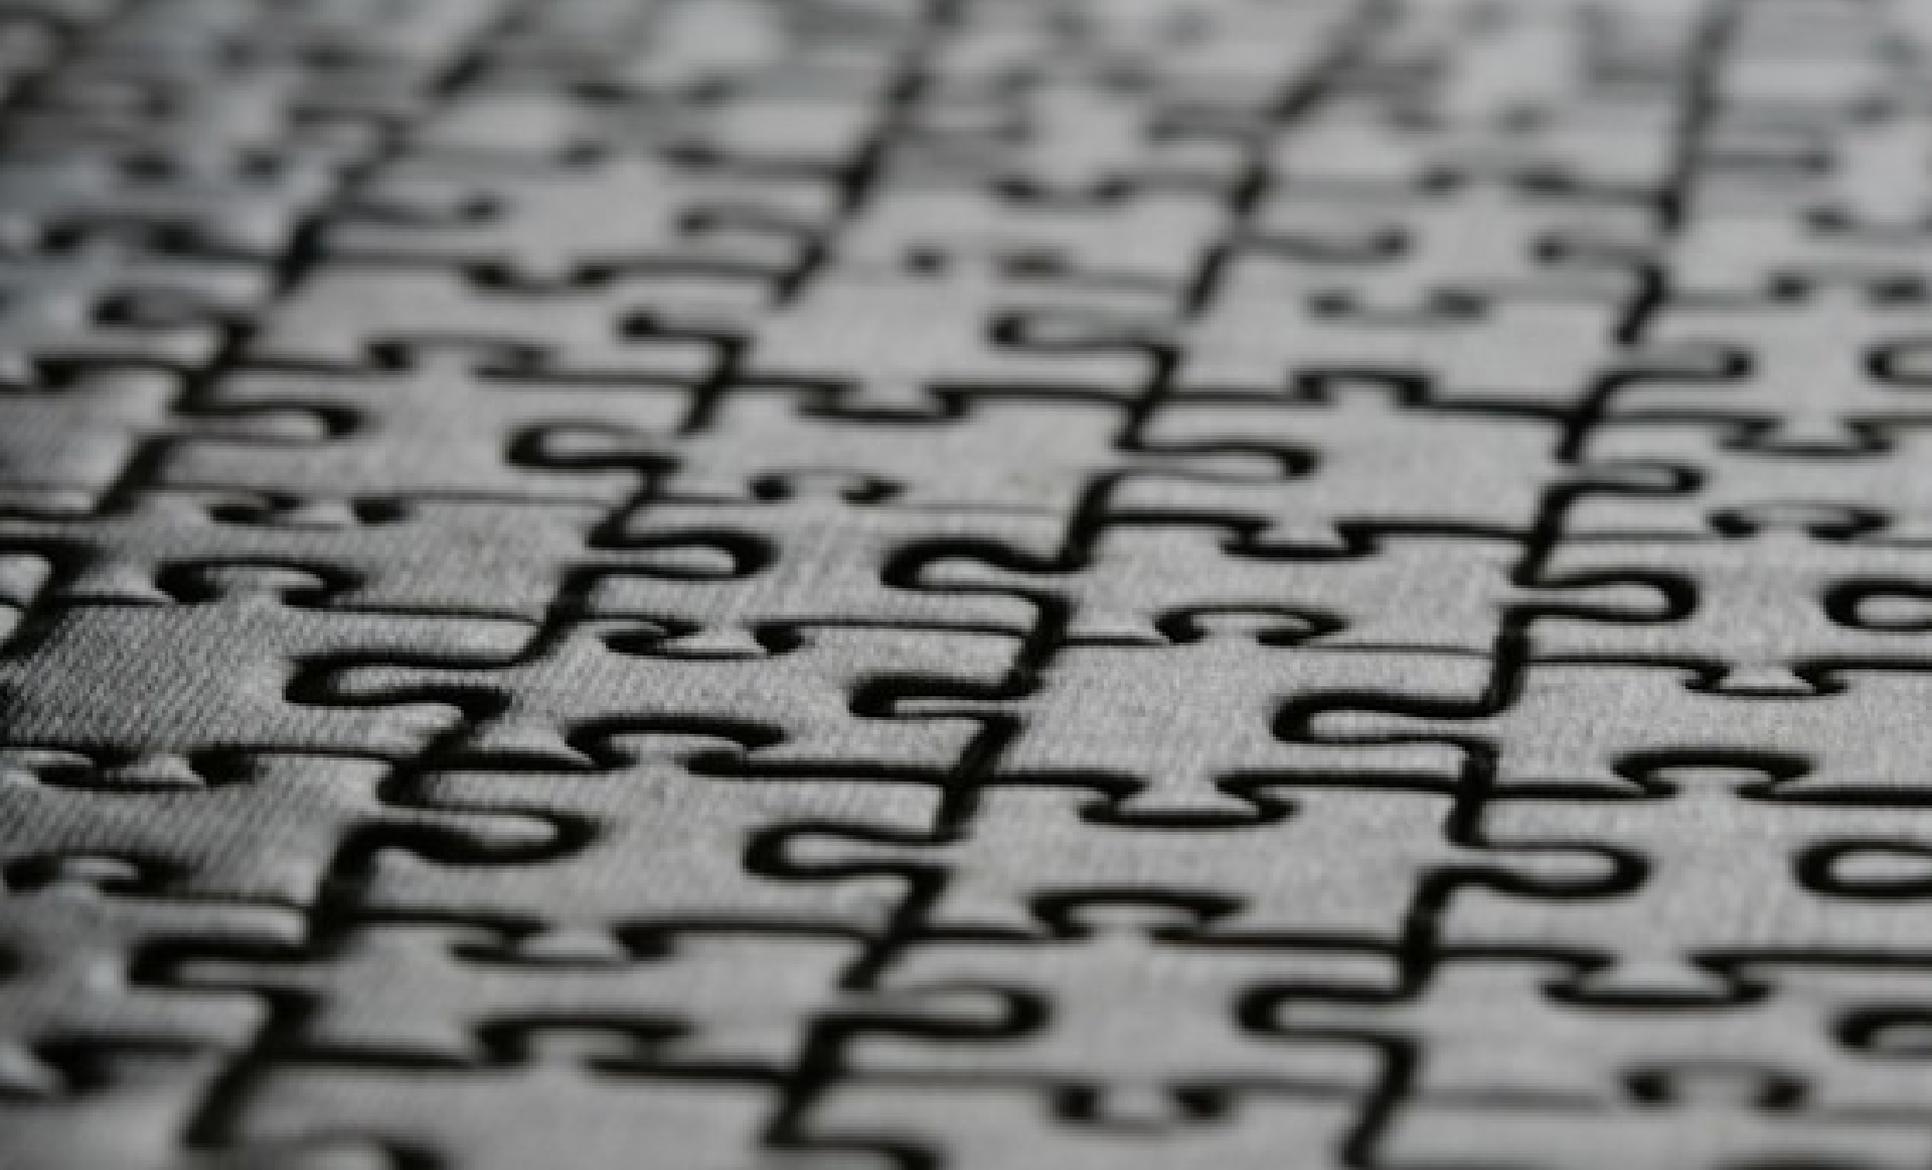

Long term perspective

High Level
commitment

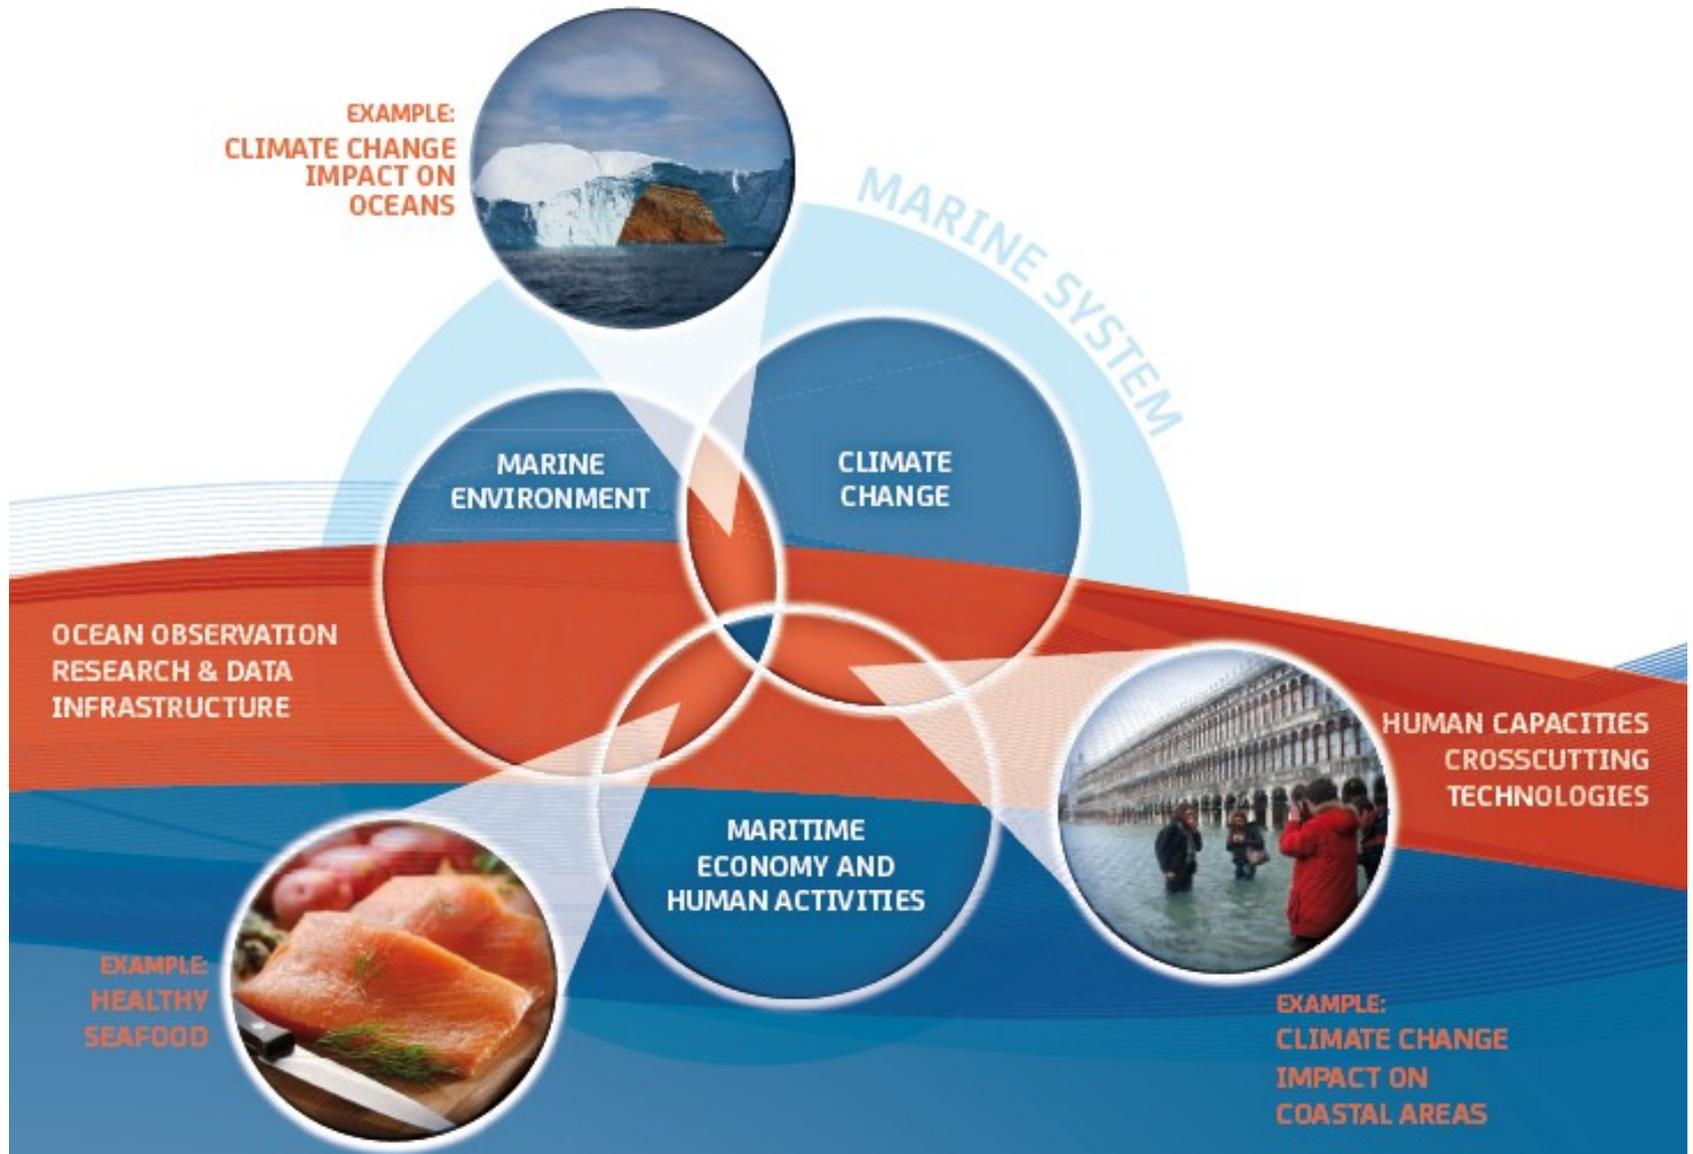

Voluntary basis
(Variable geometry)

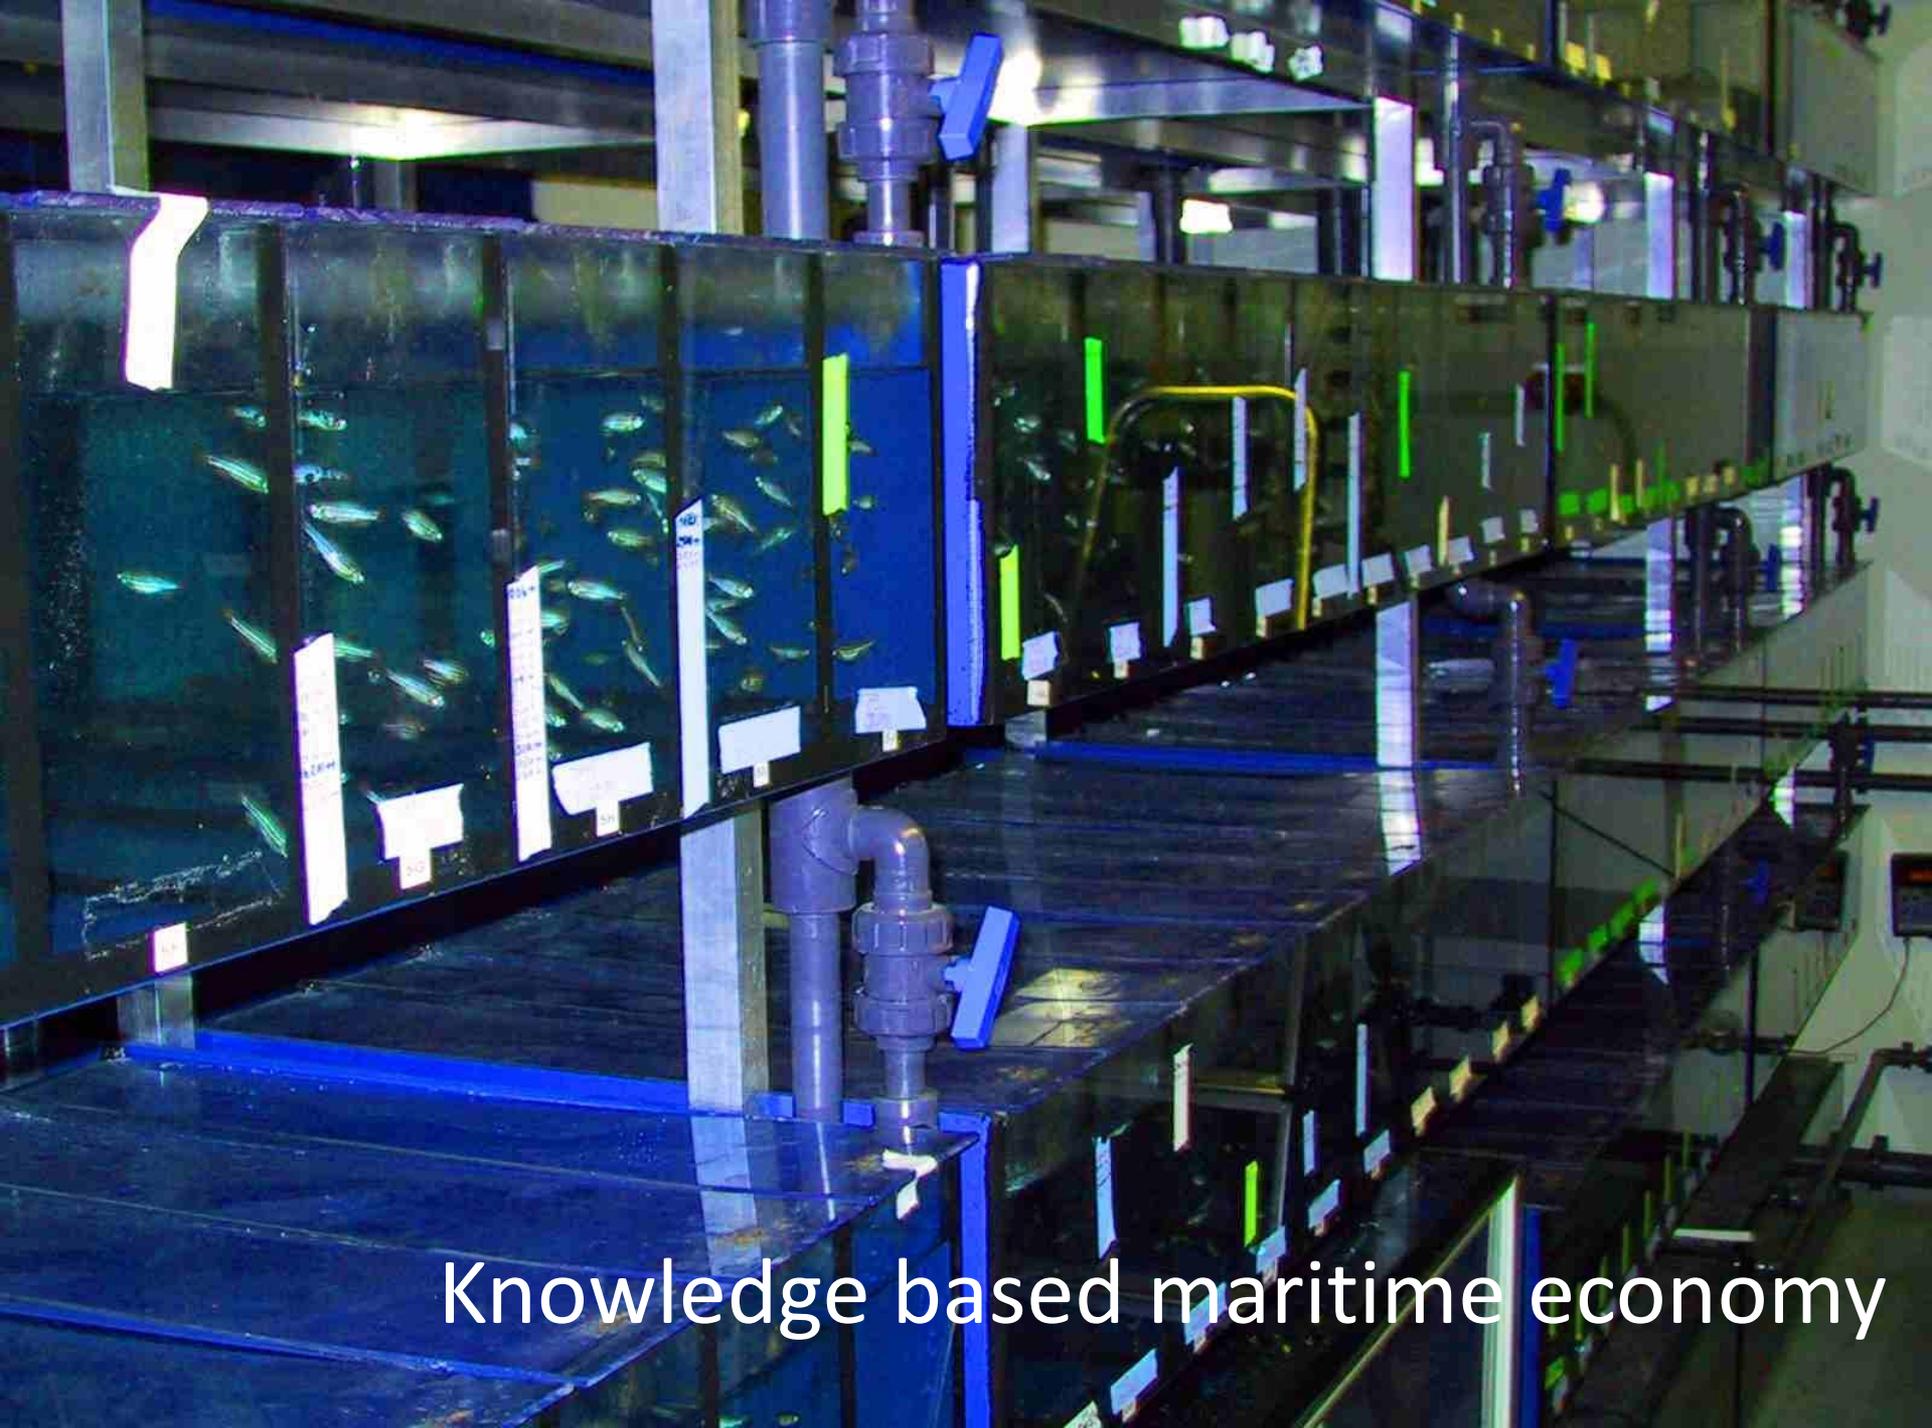

Different tools

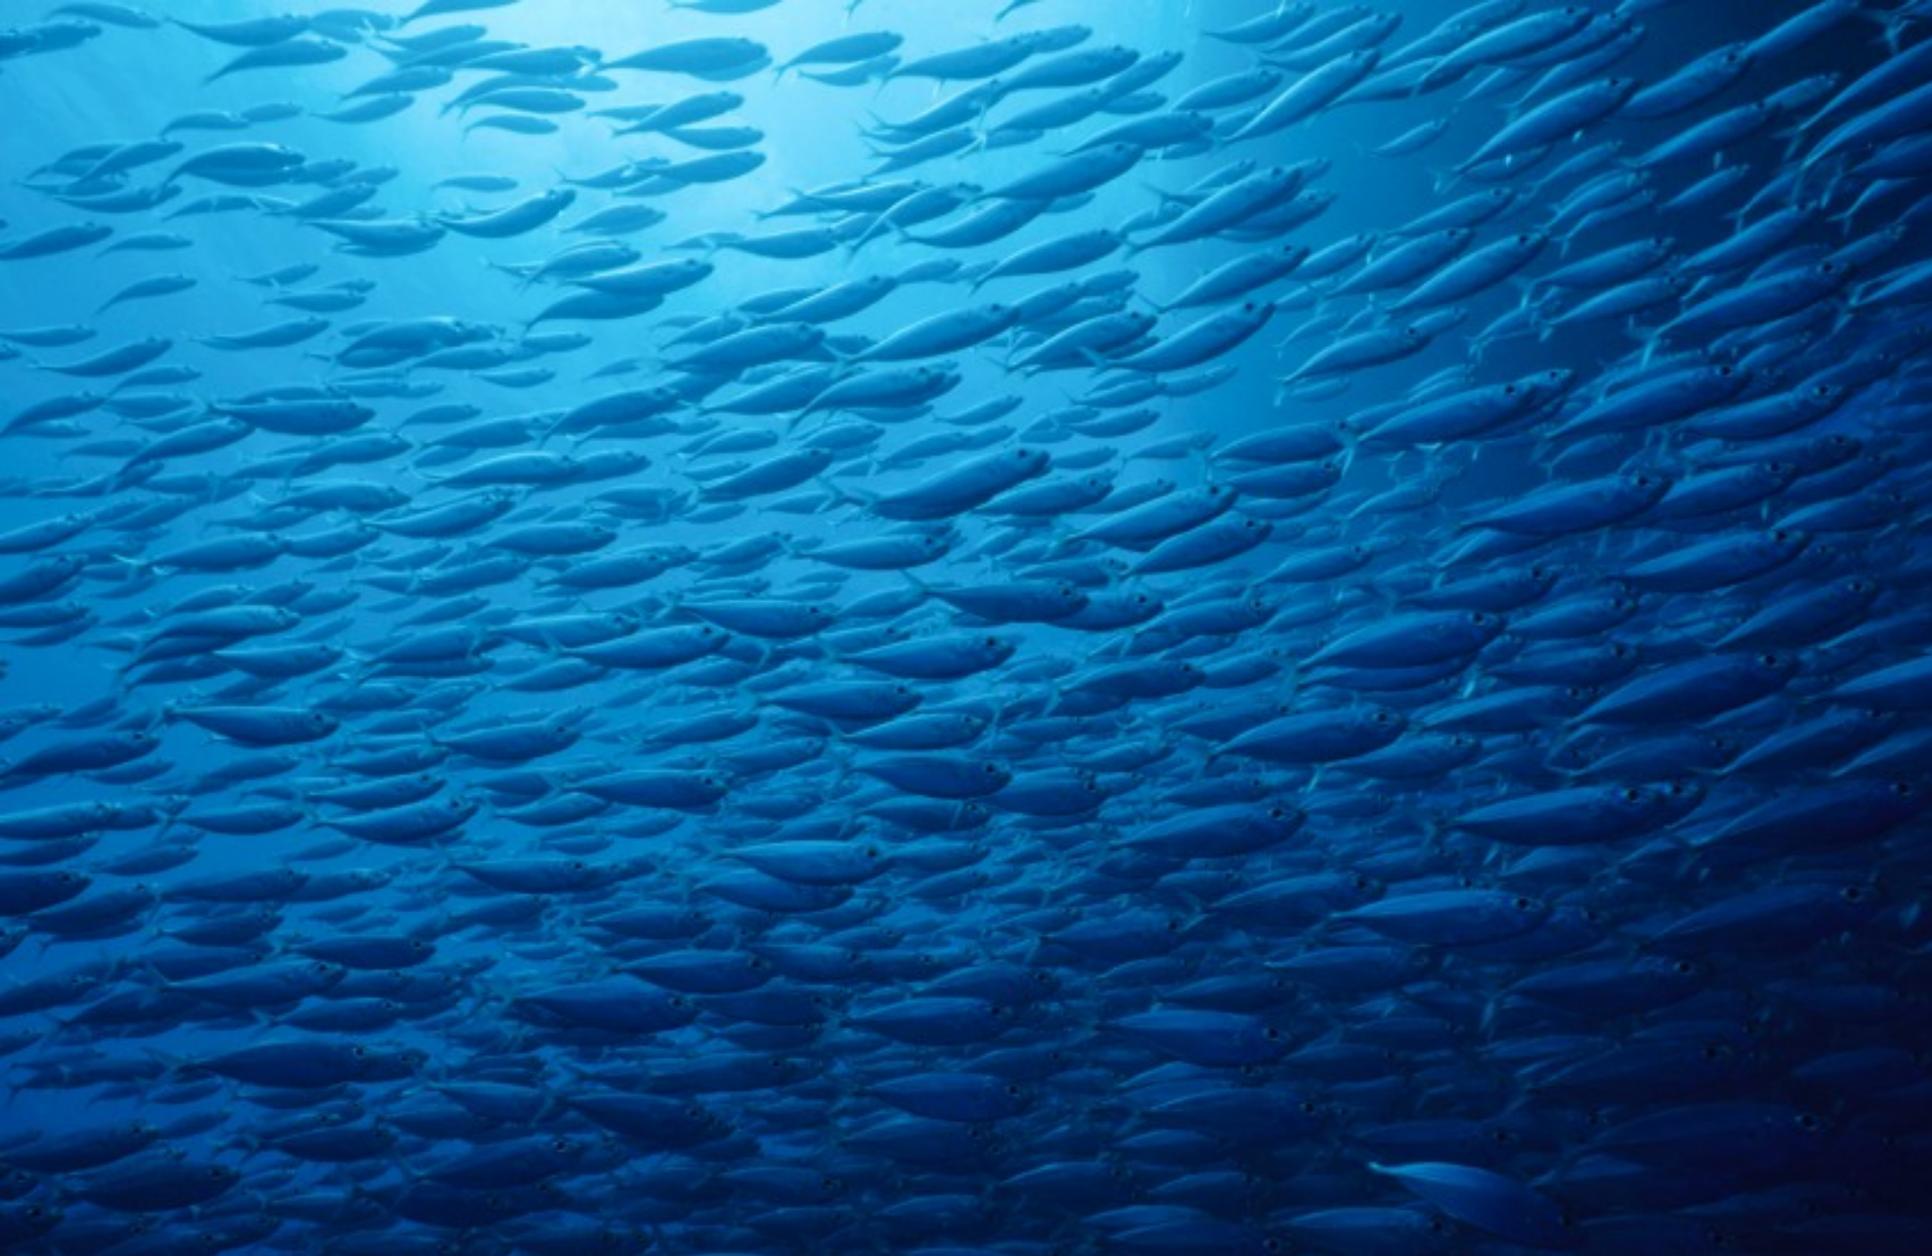

Vision document

Goals

Knowledge based maritime economy

Good environmental status of the seas

Optimise the response to climate change....

...and its impacts

Objectives

Foster enabling cross-cutting marine technologies across the maritime sectors

Understand climate change impact on coastal areas and the design of marine structures and activities, to optimise mitigation and significantly reduce costly damages

Understand and mitigate the impact of climate change and pressure from human activities on the marine environment to reach GES of our seas by 2020

Improve understanding of marine ecosystems and their processes, in particular delivery of ecosystem services and the impact of human activities

Develop and sustain infrastructure to support an integrated data and information base enabling industrial development and supporting maritime governance

Foster the inter-disciplinary human capacities that are necessary to fulfil the JPI's goals

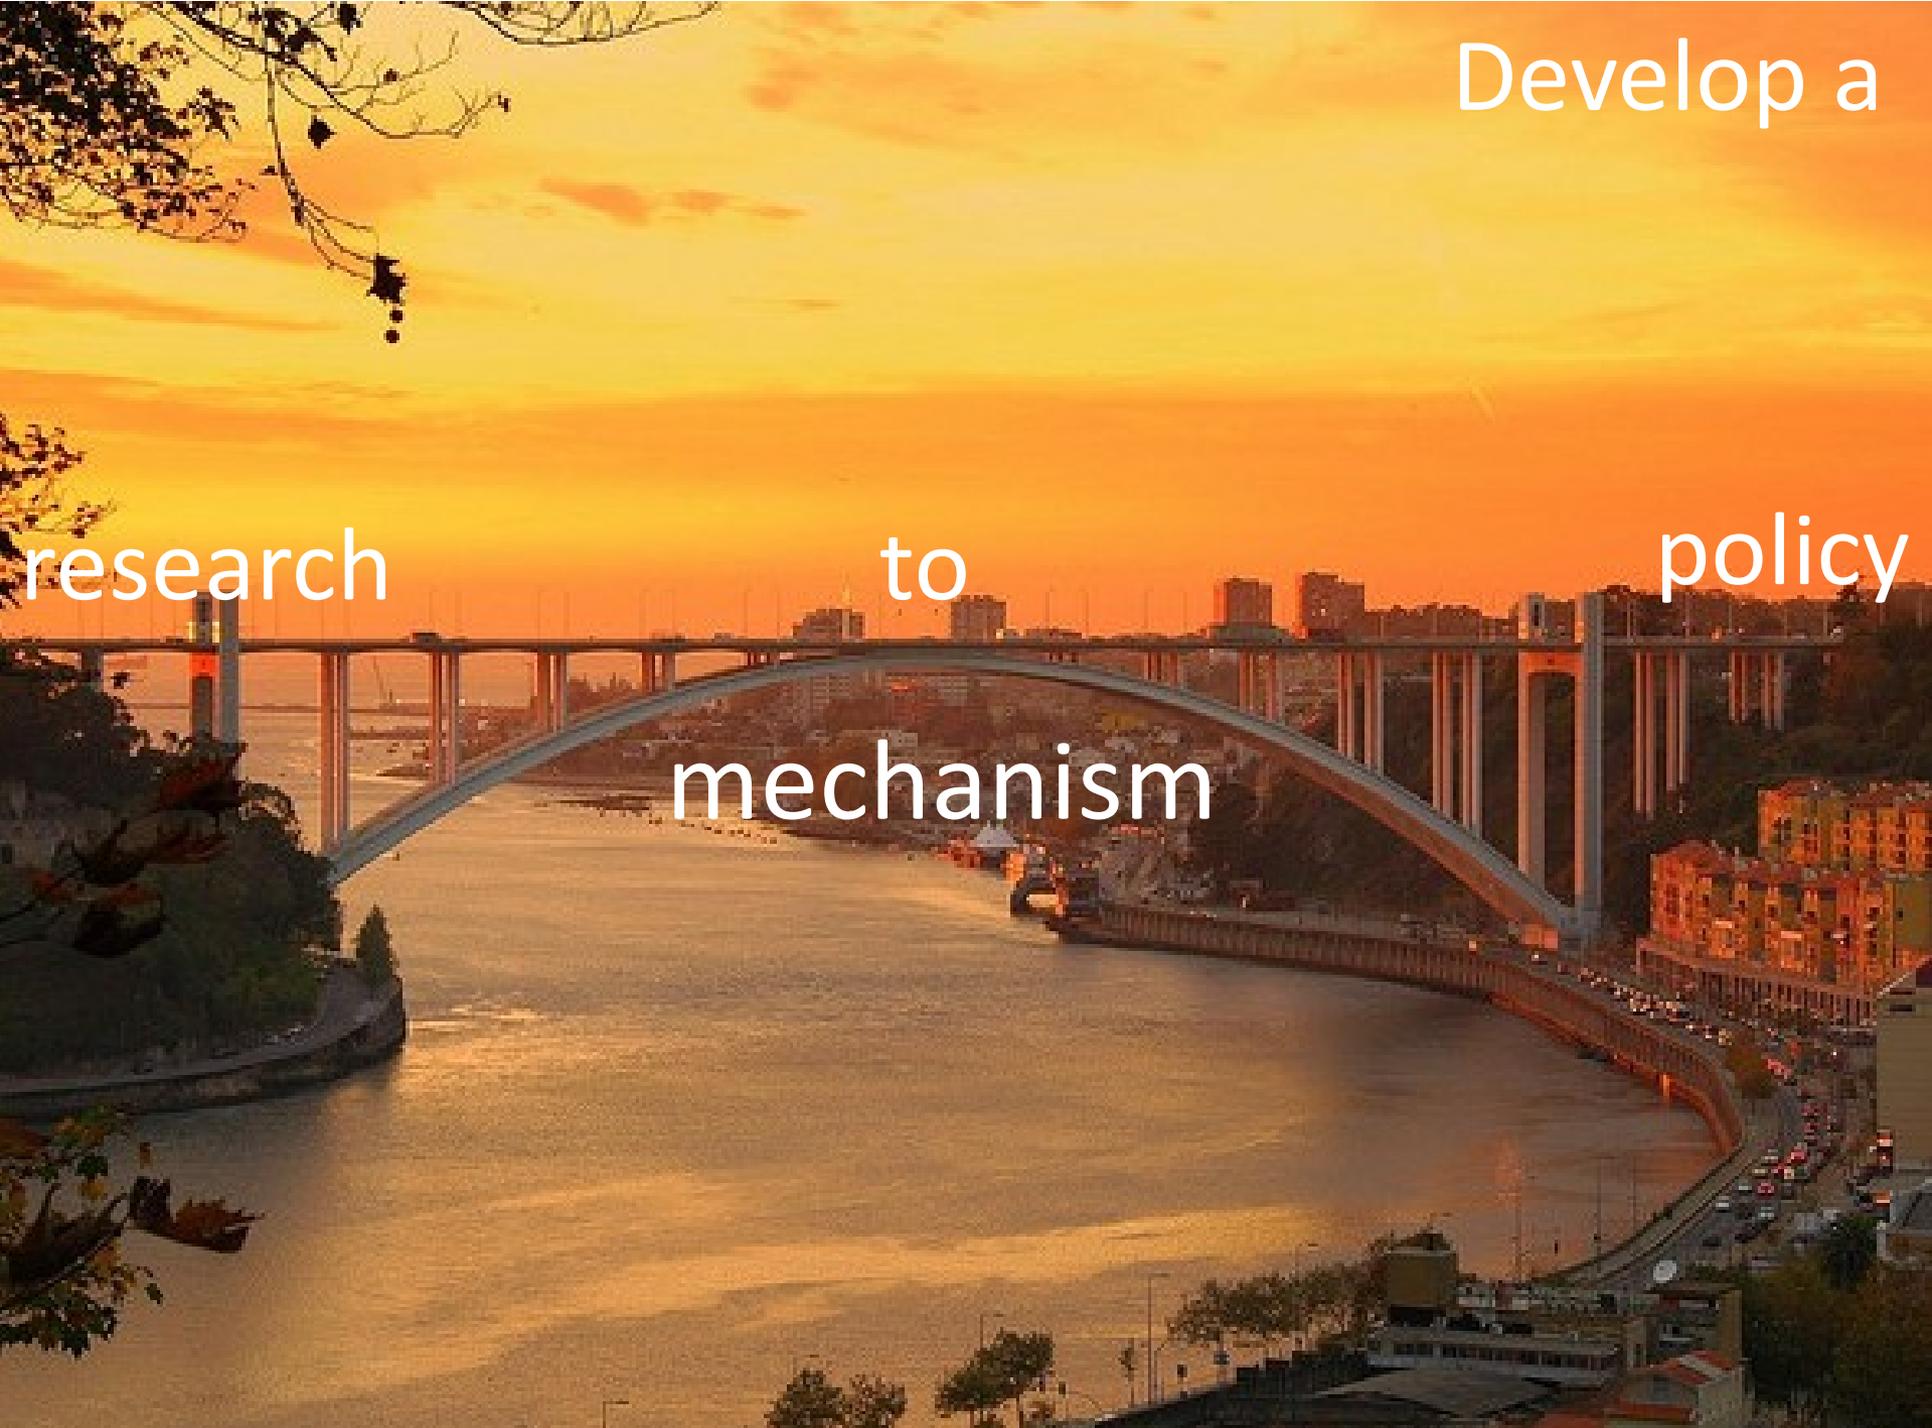

Develop a

research

to

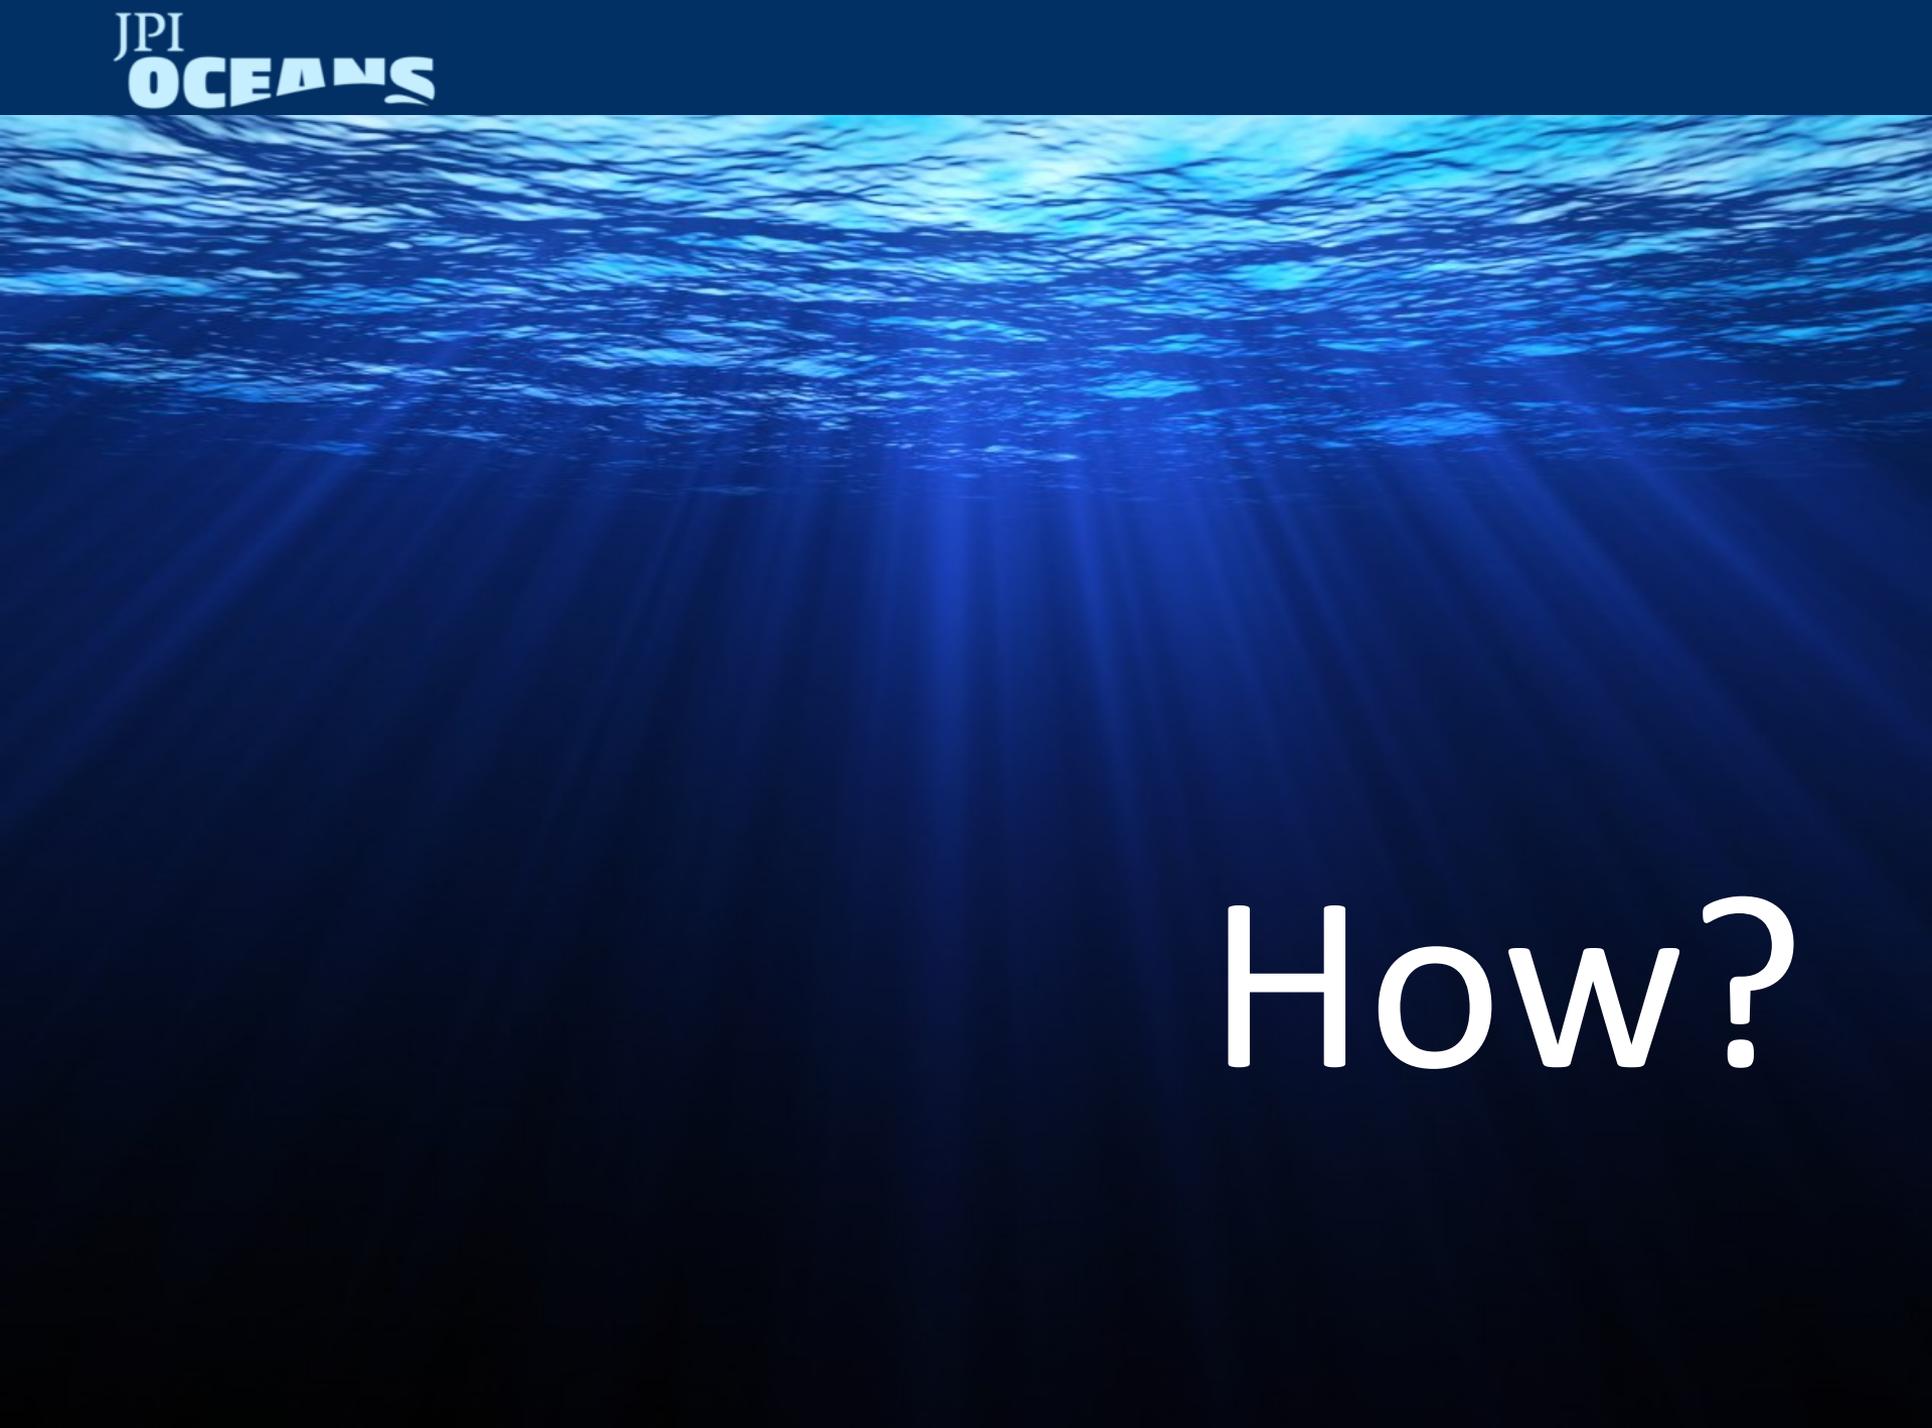

policy

mechanism

Foster the marine bio economy

An underwater photograph showing sunlight rays filtering through the water surface, creating a serene blue environment. The rays are most prominent in the center and right side of the frame, illuminating the water with a bright, ethereal glow. The water surface is visible at the top, with gentle ripples and a shimmering effect from the light.

How?

Target Groups

Industry
&
Services

Researchers
&
Technologists

Policy makers
&
Society

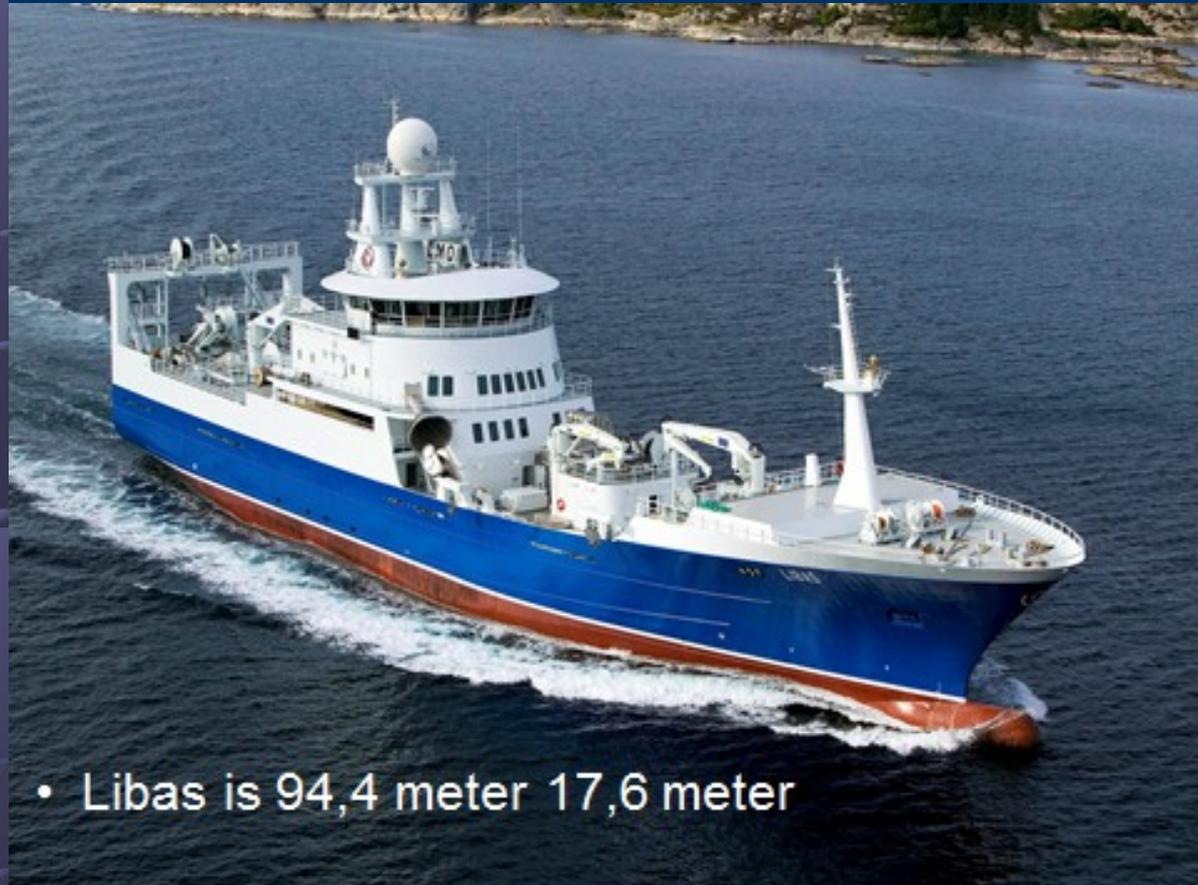

Thinking out of the box,
forget historical boundaries

Lars Olav Lie, CEO

Libas 2007 cruise tracks

- Libas is 94,4 meter 17,6 meter

Unique combination of the best
fishery competence with the
most **advanced technology** infrastructure!!
Other ideas for dual uses - Cleaning of the Oceans,....

Vision and ToR Precondition !!!!!!!!!!!

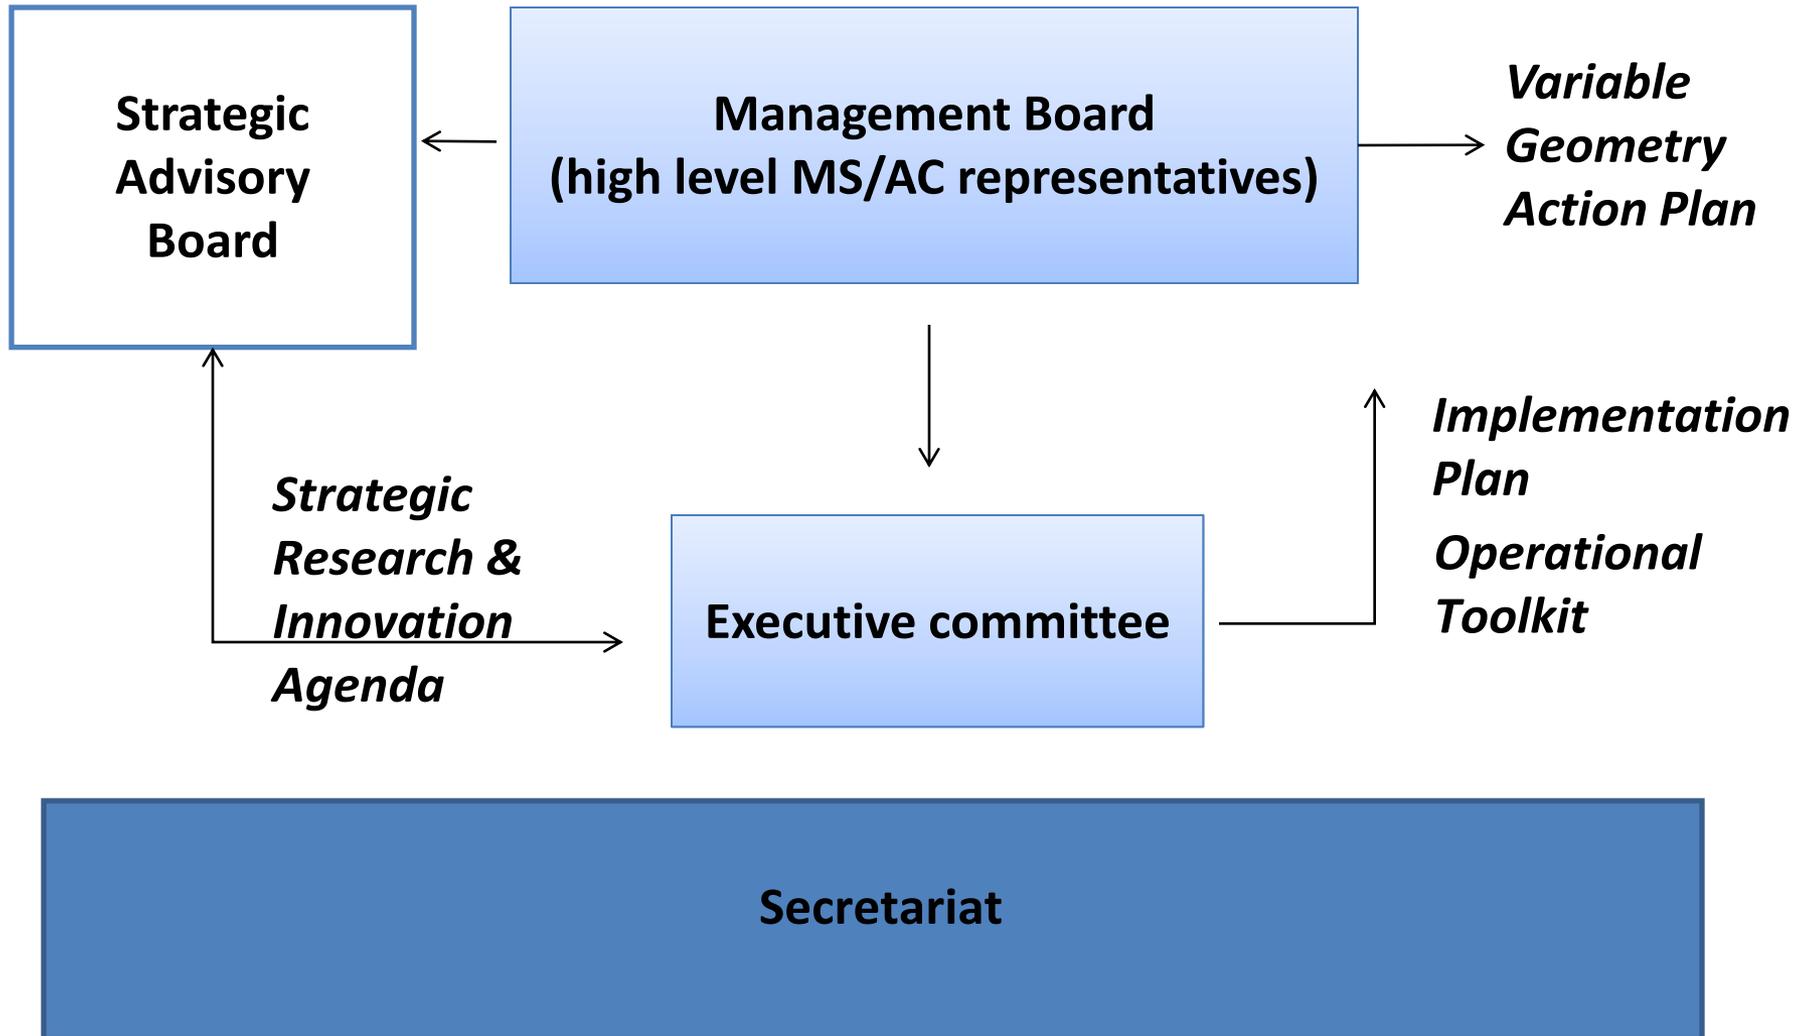

The JPI will foster a science-policy-industry P-P-P-dialog, bringing stakeholders into the governance structure.

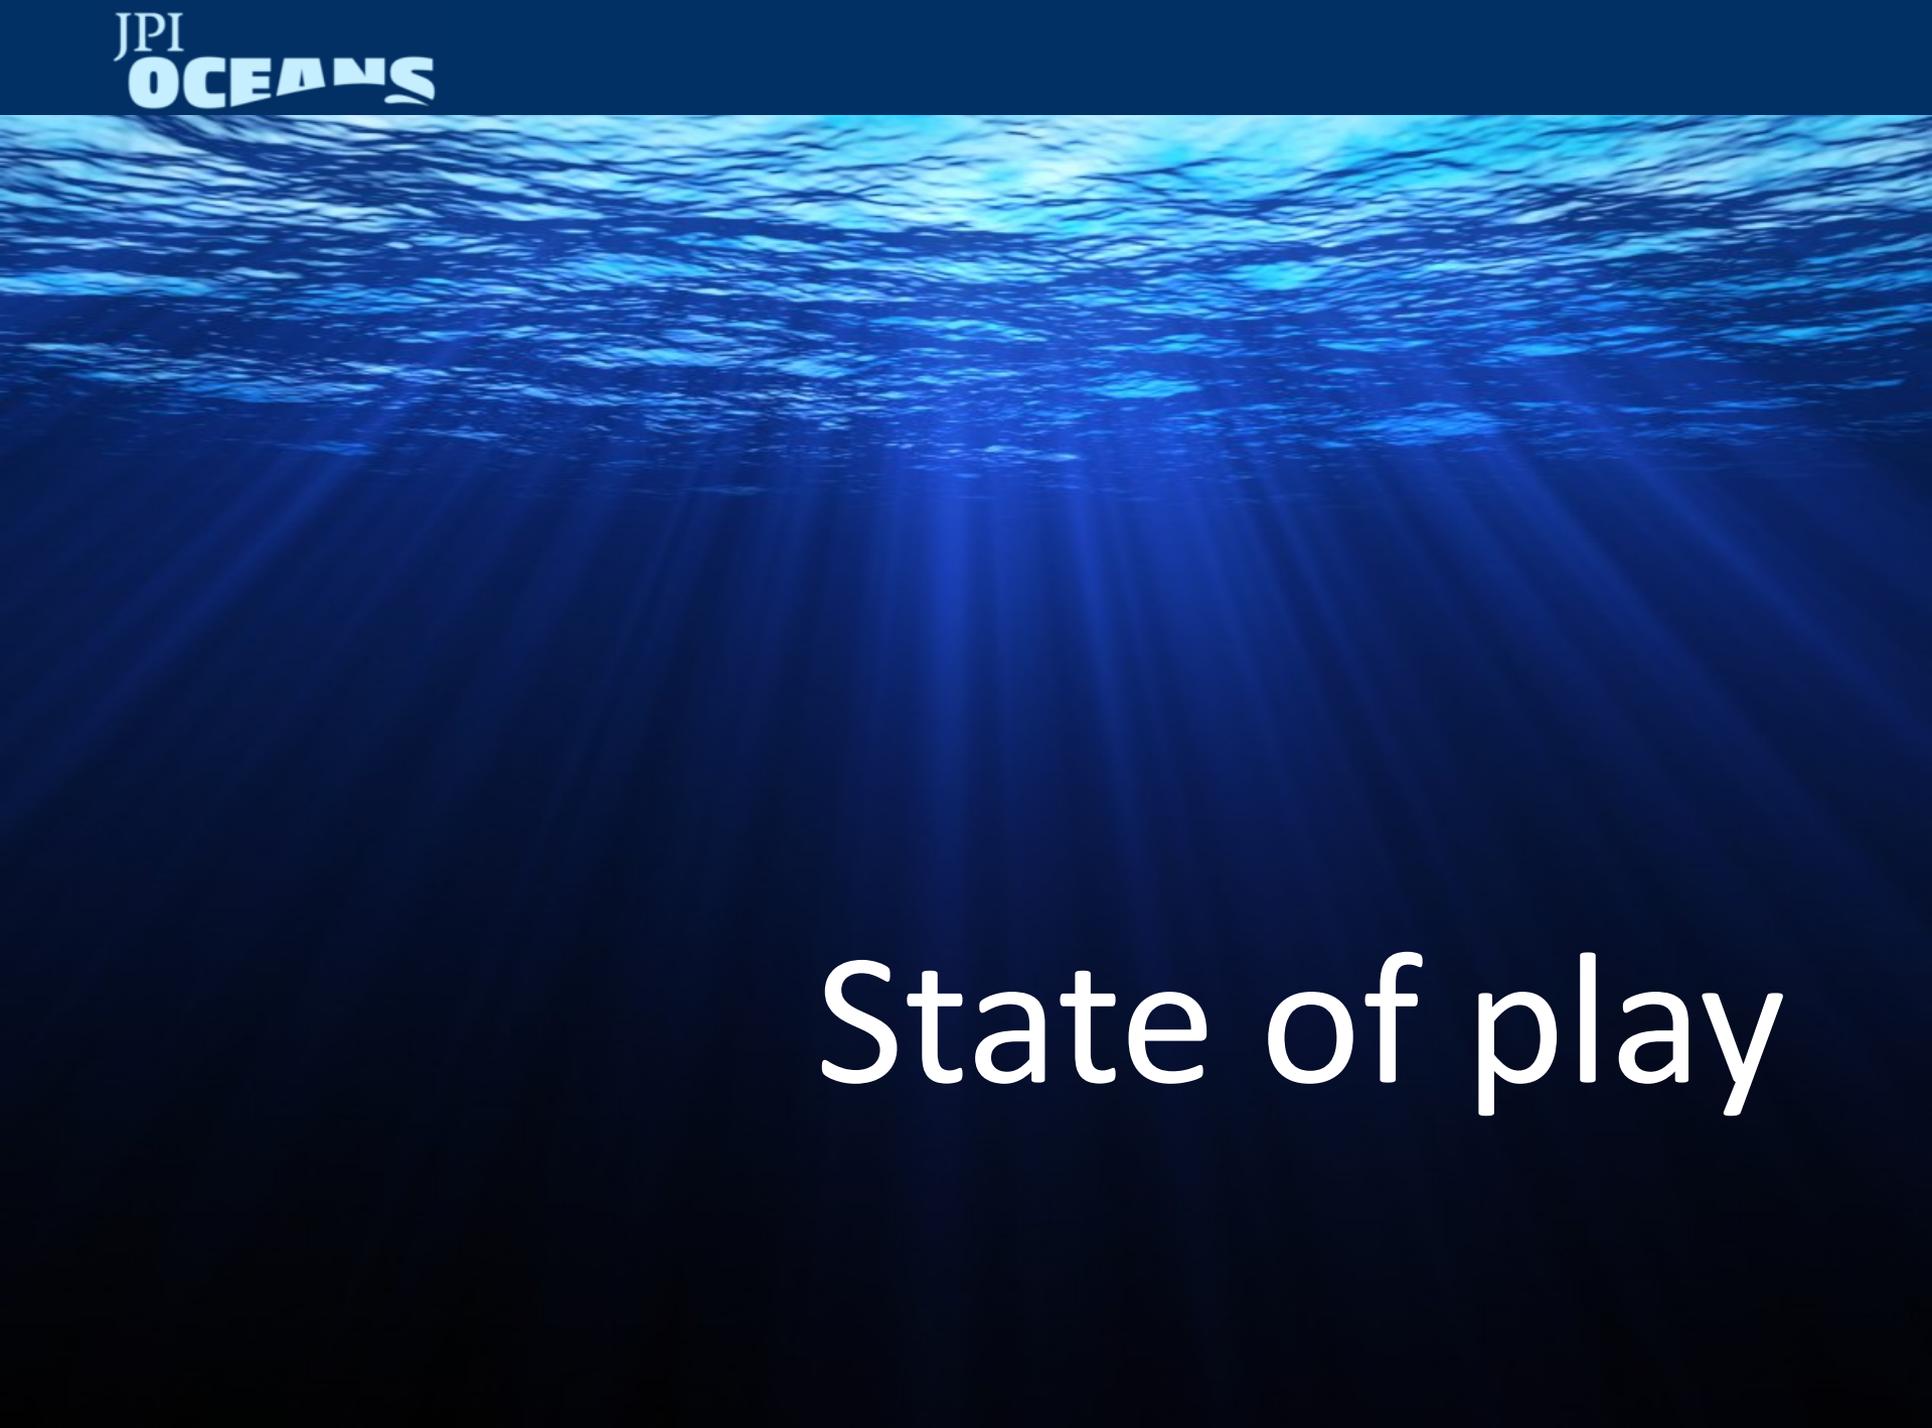

However the JPI in order to achieve its goal sees the need to take stakeholder involvement to a next step of involvement.

The JPI will be implemented by an **interactive involvement** with identified relevant stakeholders:

- Industries and Service providers (**fishermen, suppliers of maritim equipment,... recalling Libas**)
- Researchers and technologists
- Policy Makers
- Societal organisations

This will secure relevance, defining and agreeing on objectives and sharing of roles and deliverables and in particular the uptake and use of knowledge.

An underwater photograph showing sunlight rays filtering through the water surface, creating a serene and deep blue environment.

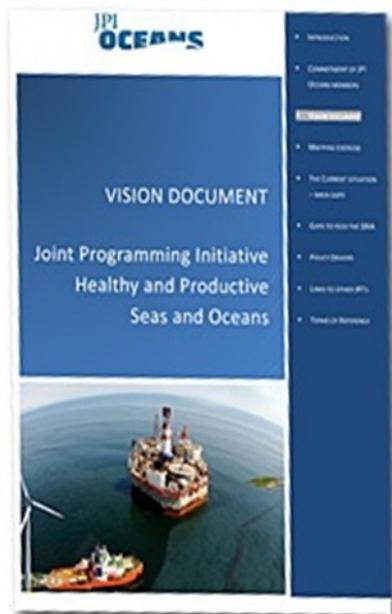

State of play

Milestones 2011

April

September

December

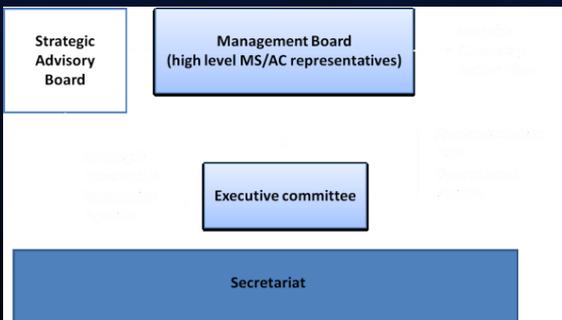

Next Steps:

**Consolidate
governance**

Horizon2020

**Operationalise
CSA**

**SRIA input
Pilot Actions**

CSA Oceans
Coordination and Support Action to the Joint Programming Initiative Healthy and Productive Seas and Oceans

Call
FP7-SST-2012-RTD-1
Topic
SST 2012.11-2 Support to the development of joint programming in marine and aquatic research to address cross-cutting societal challenges (support actions within the framework of the 'Cross of Excellence')

Type of funding scheme
Coordinated and Support Action (Support)

Project Coordinator:
Kielmar Angulo-Sanchez, Research Council of Norway (RCN)

List of Participants:

N.	Organization name	Short name	Country
1.	Research Council of Norway	RCN	Norway
2.	Vlaamse Instelling voor de Zee	VIZIE	Belgium
3.	Ministerio de Ciencia e Innovación	MICINN	Spain
4.	Institut Français de Recherche pour l'Exploitation de la Mer	IFREMER	France
5.	Conseil National de la Recherche Scientifique	CNRS	France
6.	Nederlandse Organisatie voor Wetenschappelijk Onderzoek	NWO	Netherlands
7.	Natural Environment Council	NERC	United Kingdom
8.	Koordinatör Deutsche Meeresforschung	KDM	Germany
9.	Forschungszentrum ITZ-SE	ITZ-SE	Germany
10.	Universitat Espanola per la Recerca Oceanogràfica i Ambiental, a Castellón, Dorsada de Benicarló	UEFODC	Spain
